

2. Add Header elements and Load the dataset

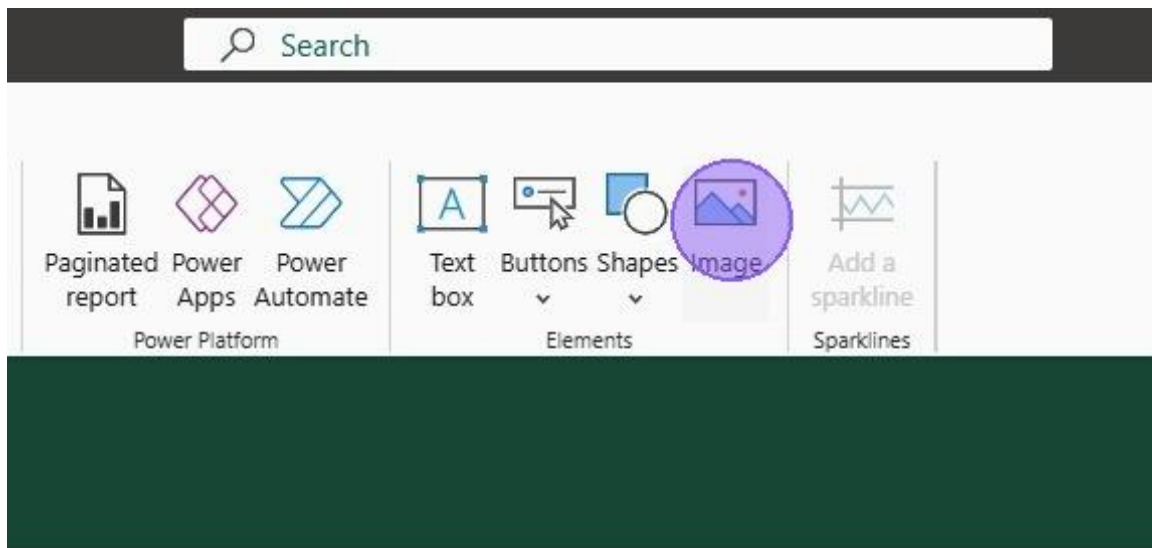

Let's start off with the header and bringing in our dataset.

Add logo

1. Click "Insert"

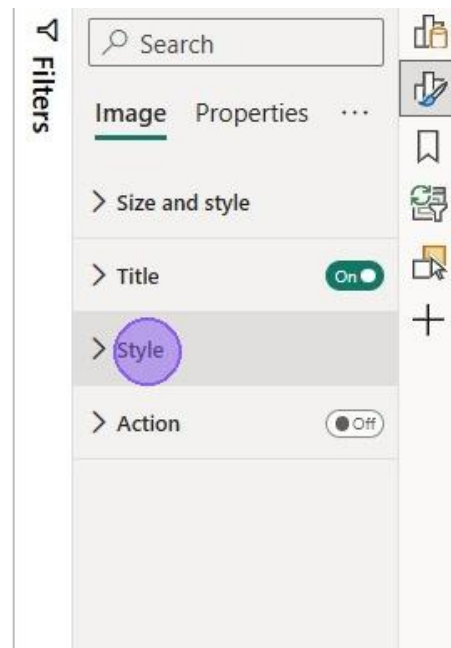

2. Click "Image"

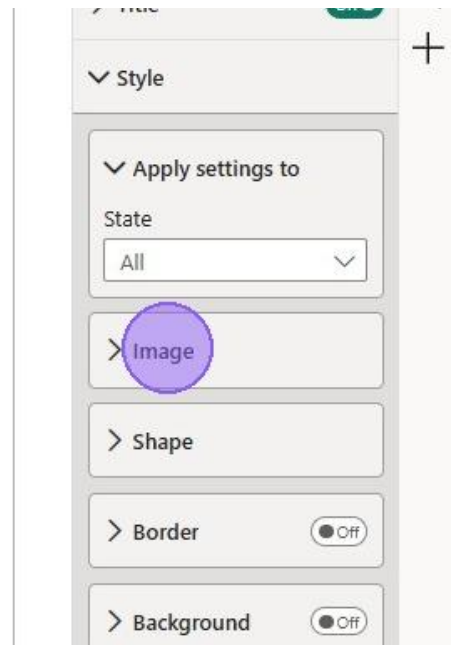

3. Click "Format" after selecting the image visual

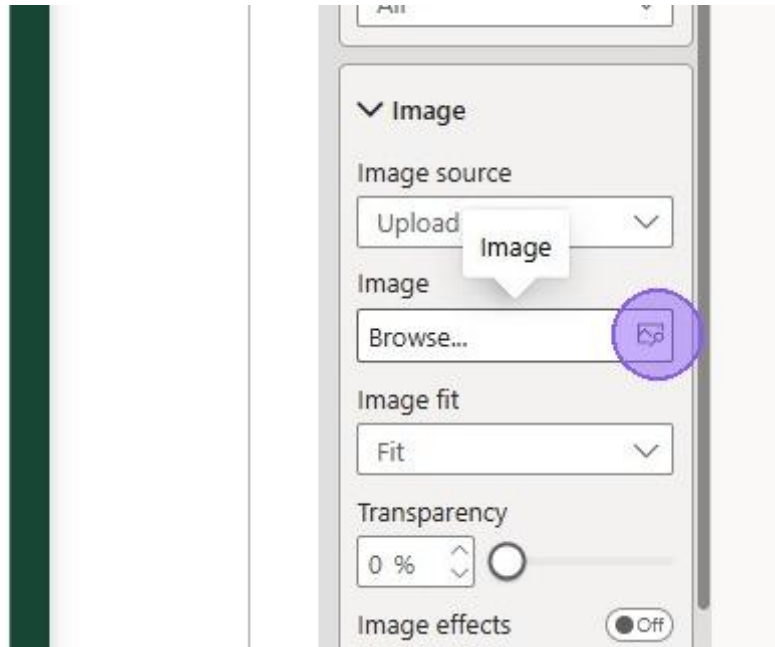

4. Click "Style"

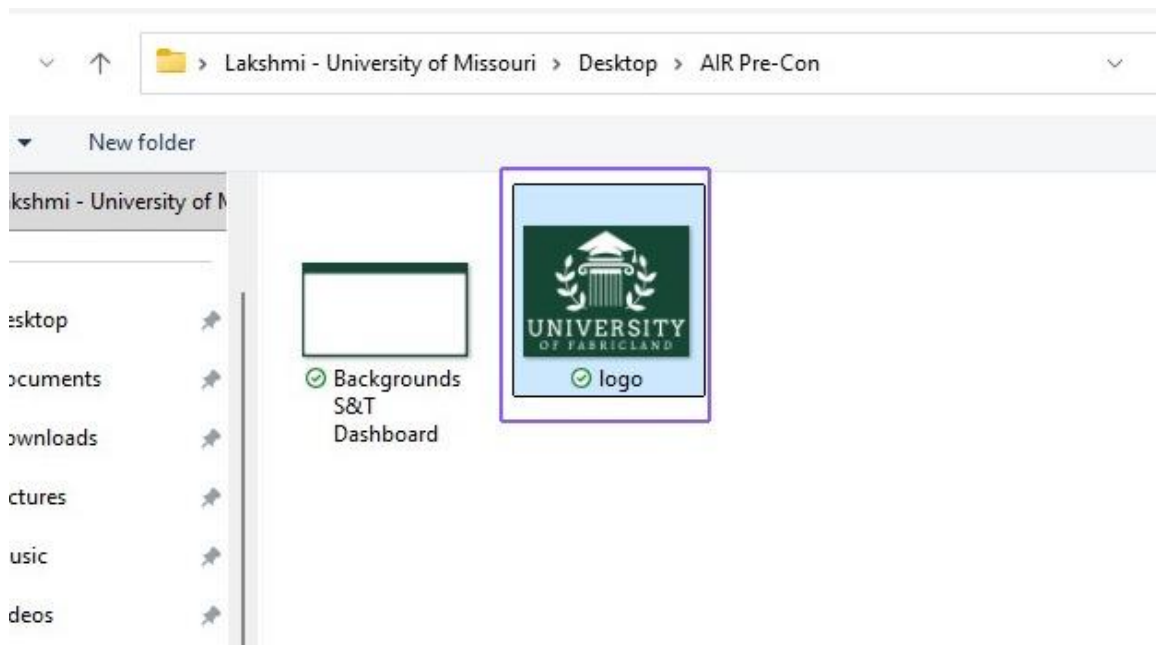

5. Click "Image"

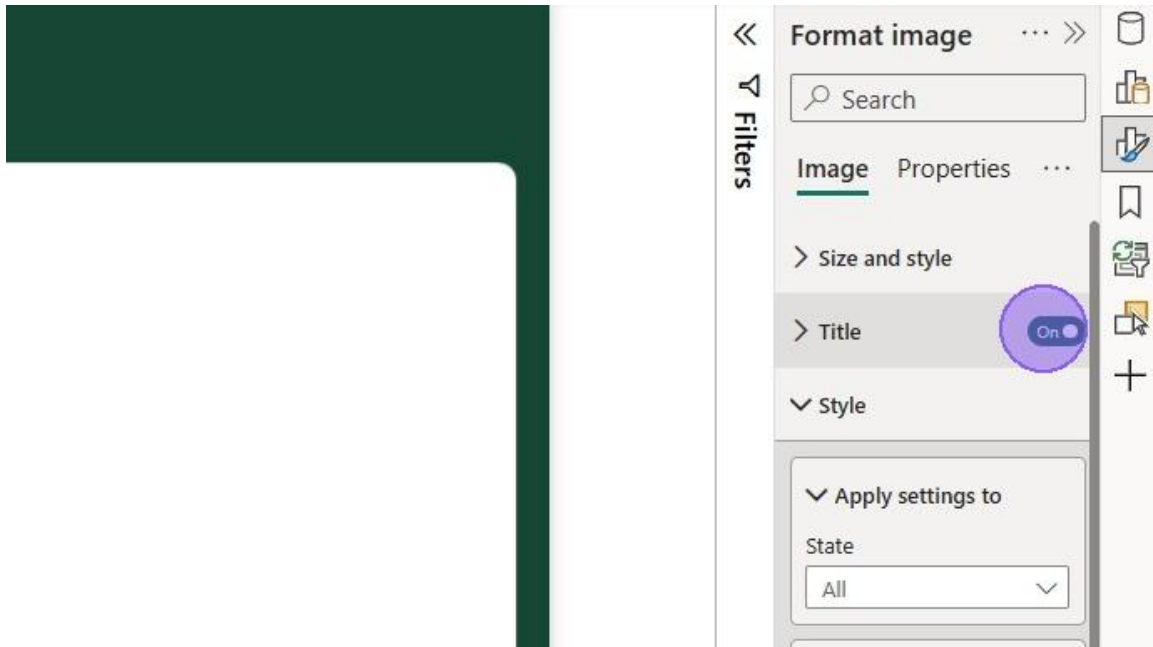

6. Click "Image Browse..."

7. Select the logo image file to upload

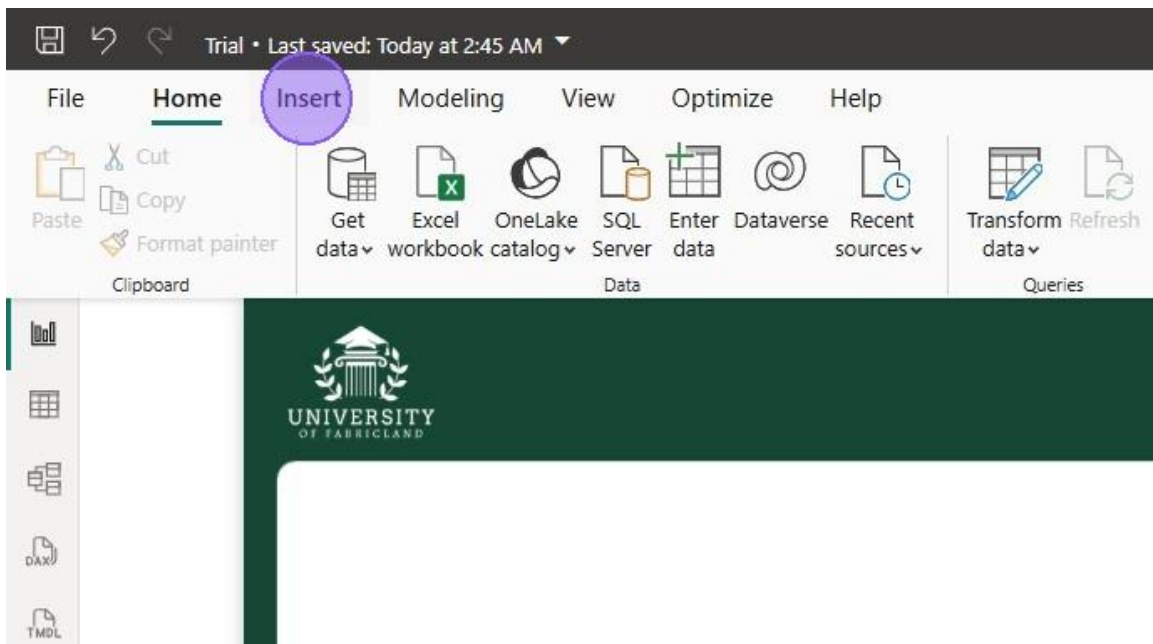

8. Toggle the Title setting in the Format pane to off

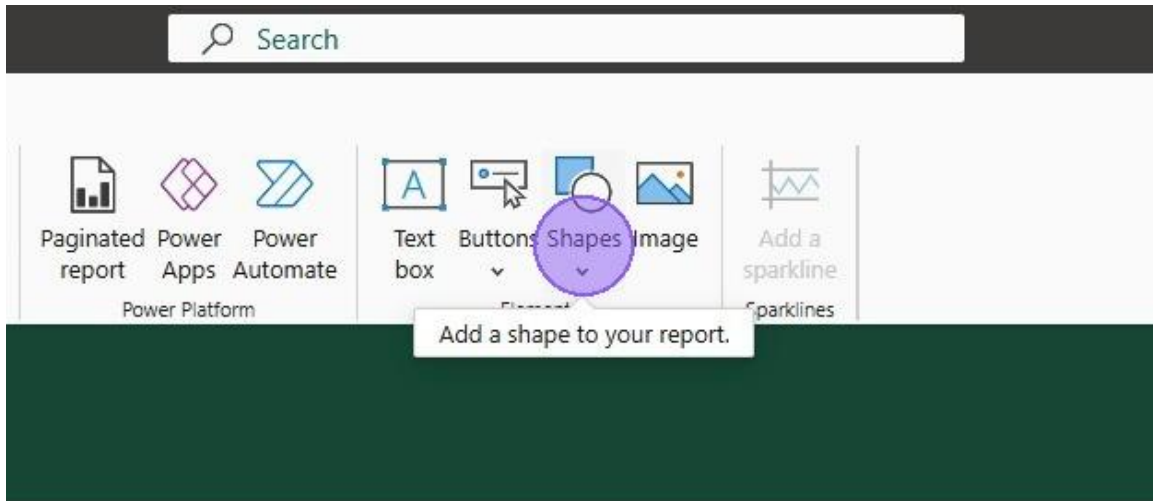

Add a Shape

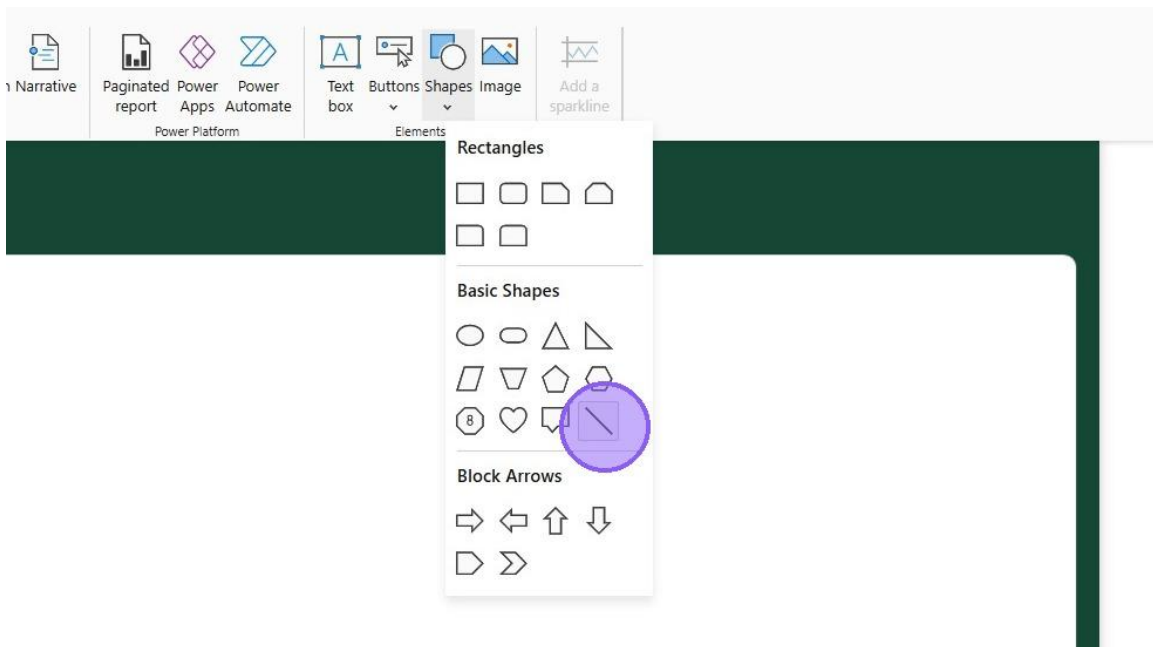

9. Click "Insert"

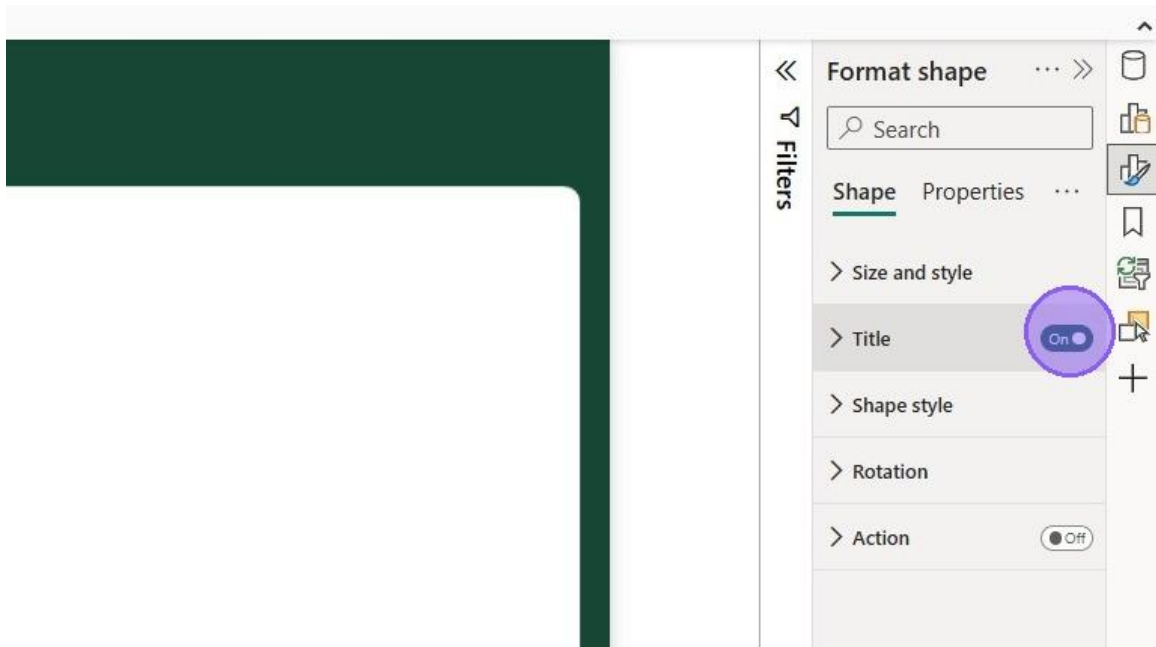

10. Click "Shapes"

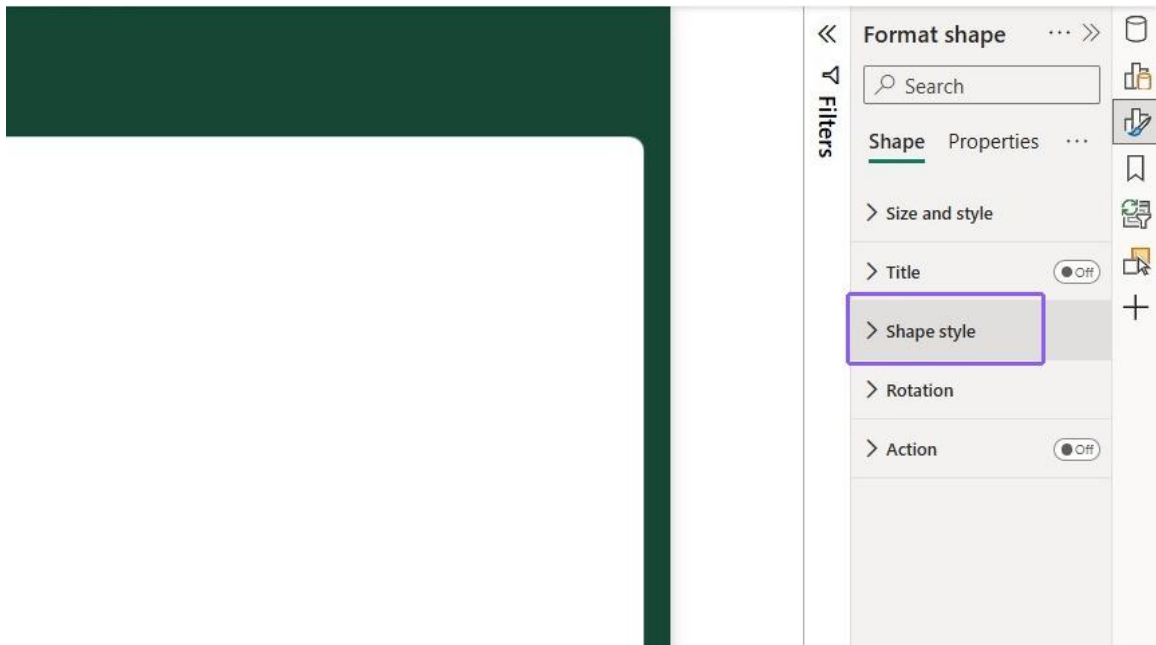

11. Click "Line"

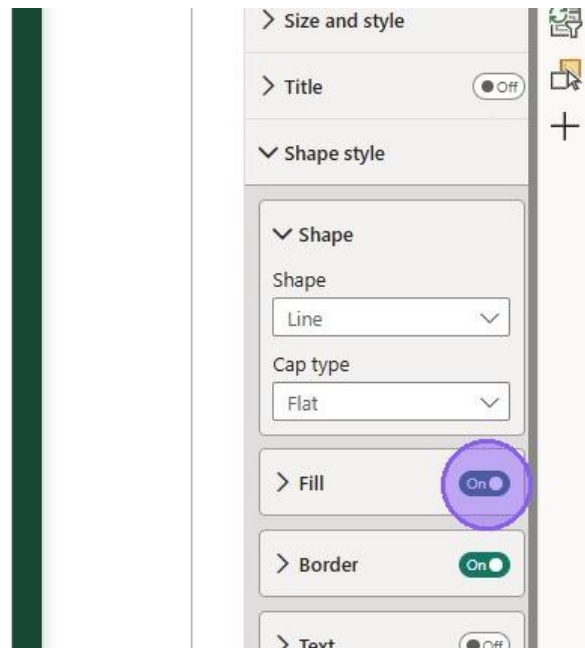

12. Turn off the title

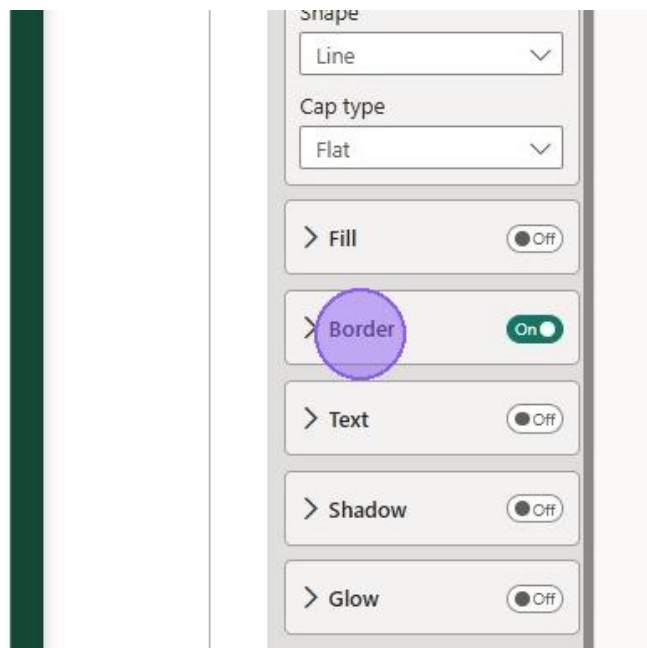

13. Click "Shape style"

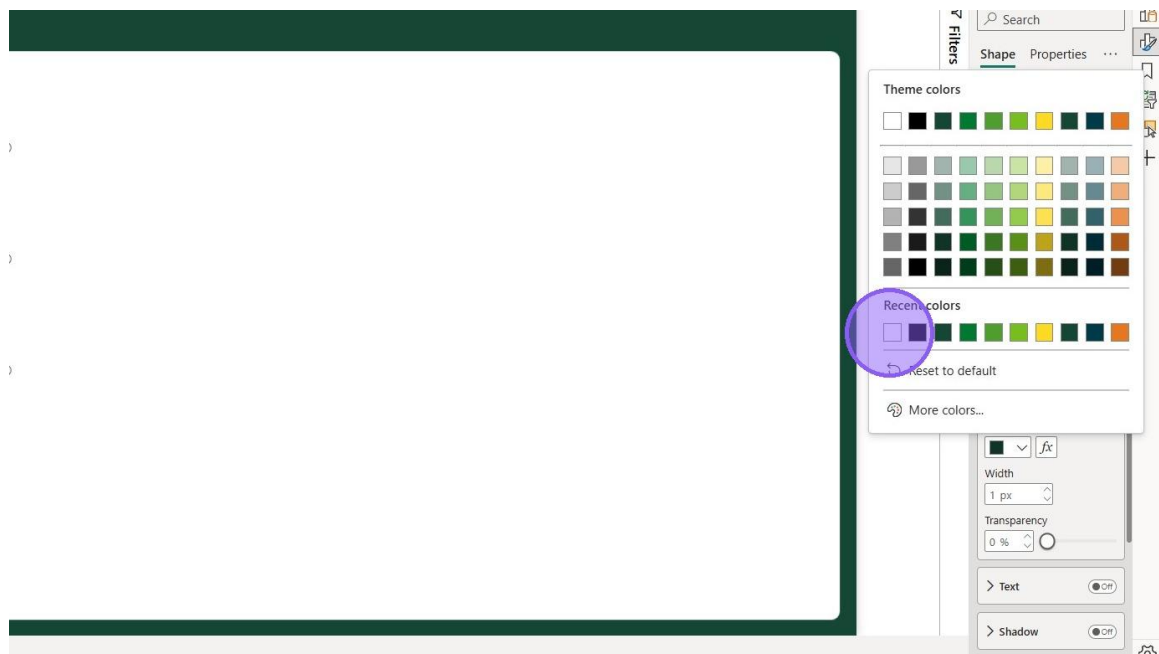

14. Switch off the fill

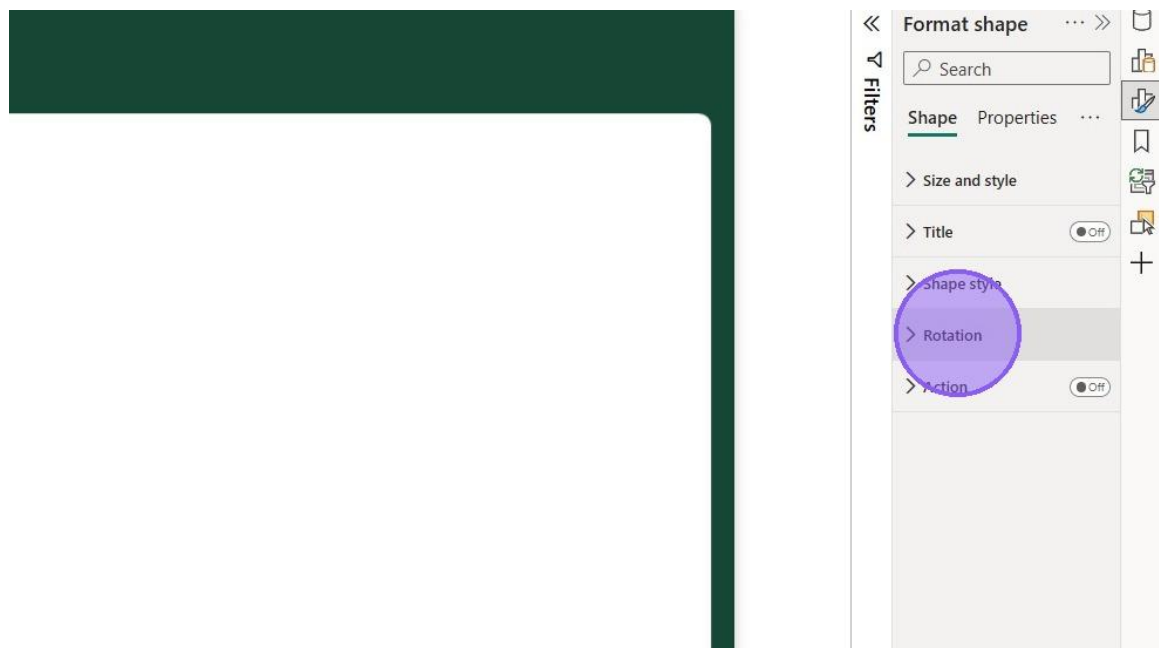

15. Click "Border"

16. Select white color from the border color list

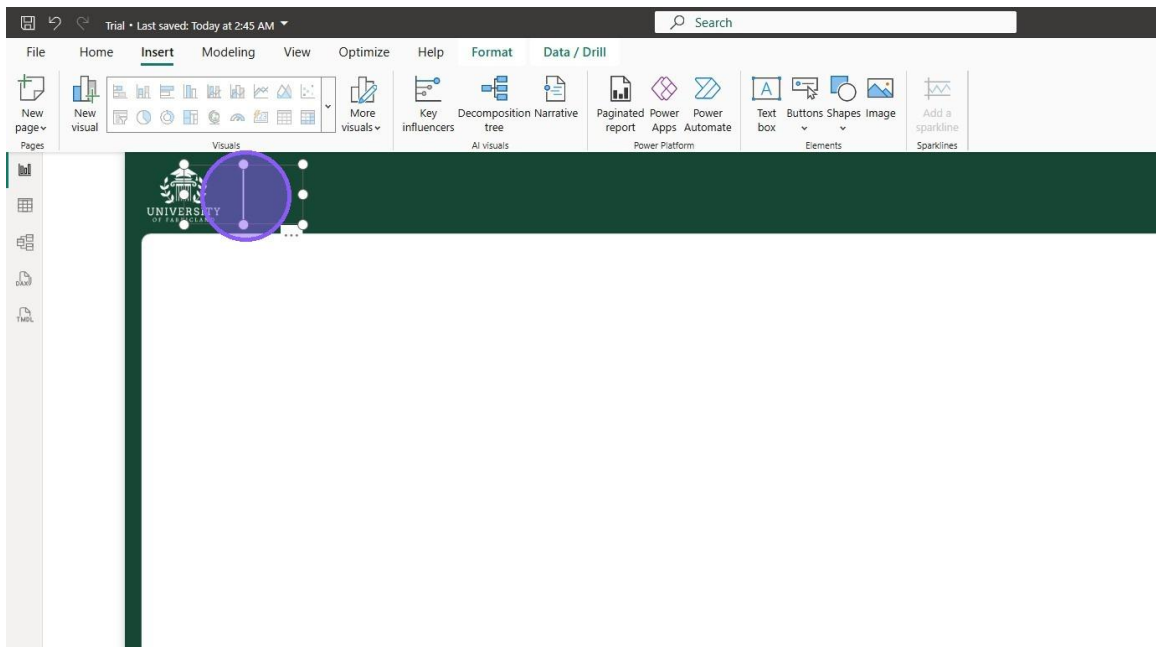

17. Click "Rotation"

18. Change rotation to 90

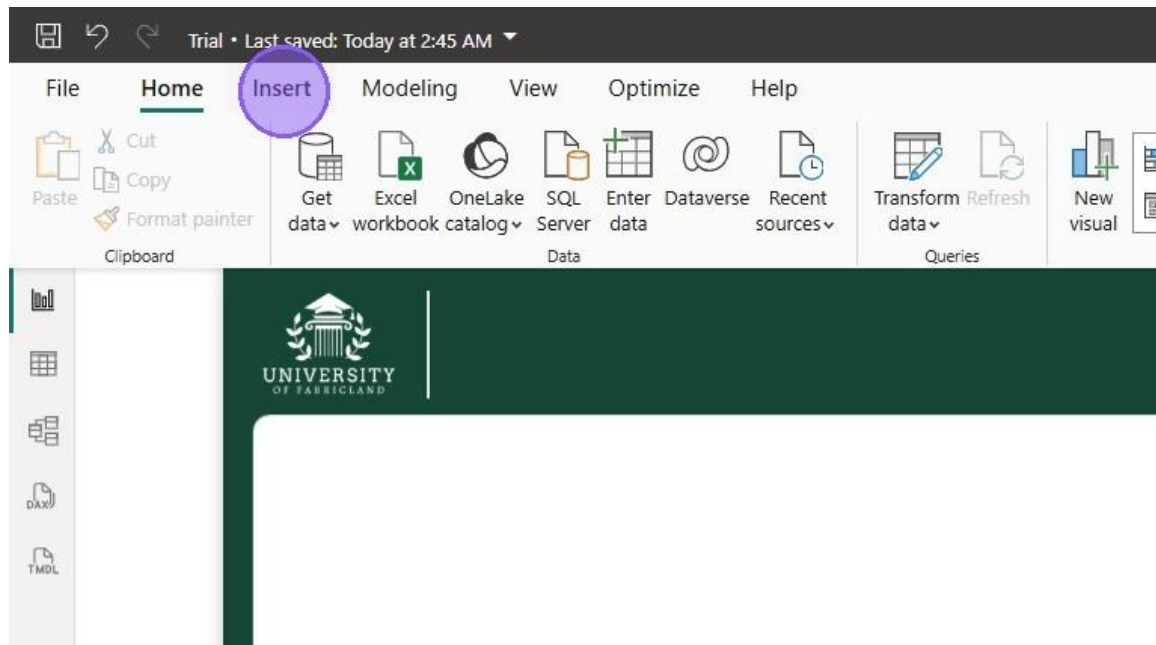

19. Place it next to the logo

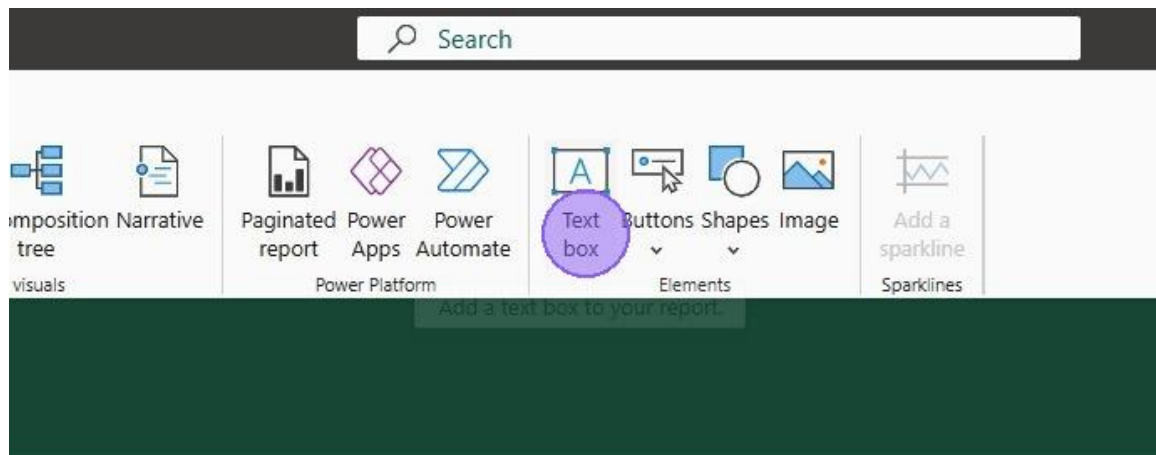

Add a header to the dashboard

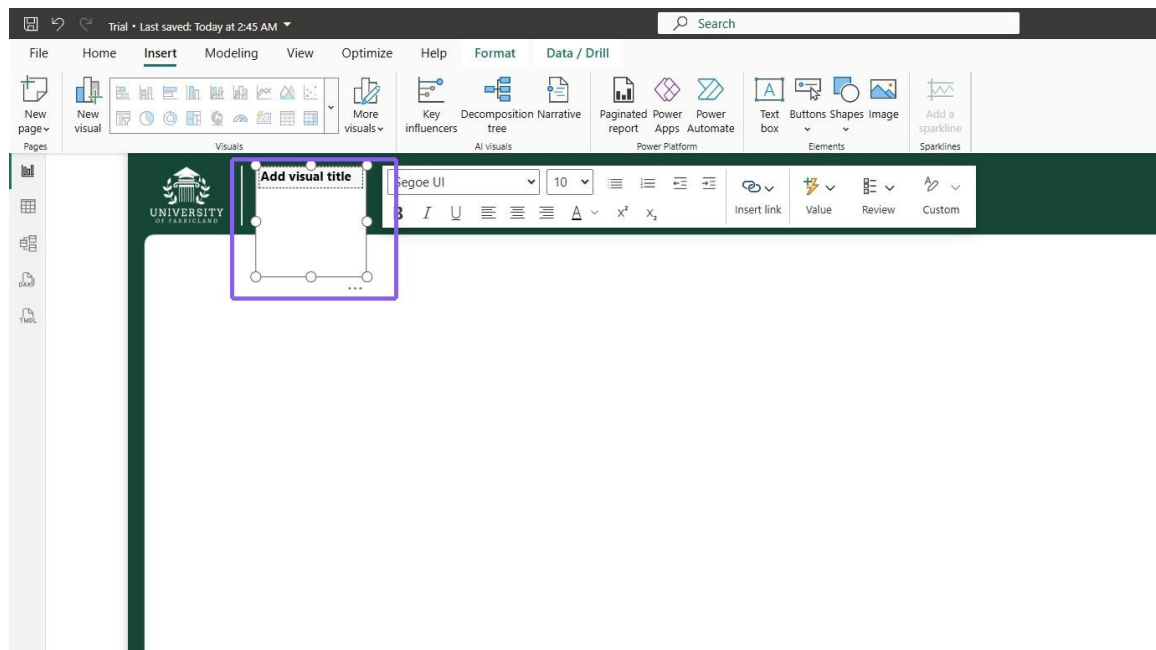

20. Click "Insert"

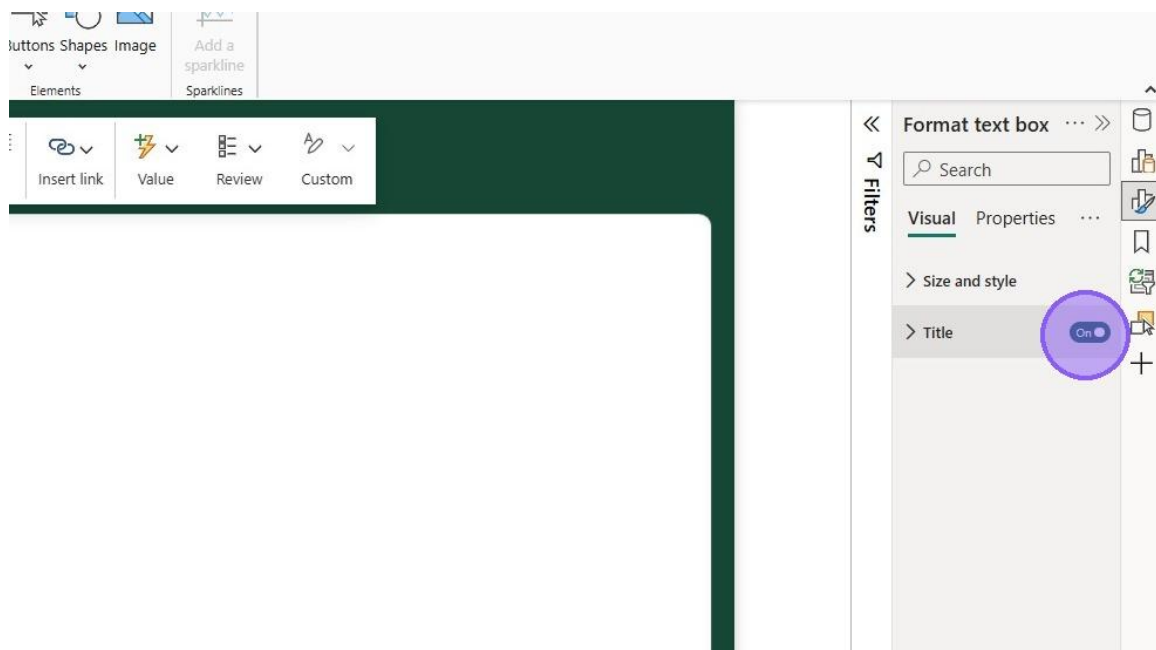

21. Click "Text box"

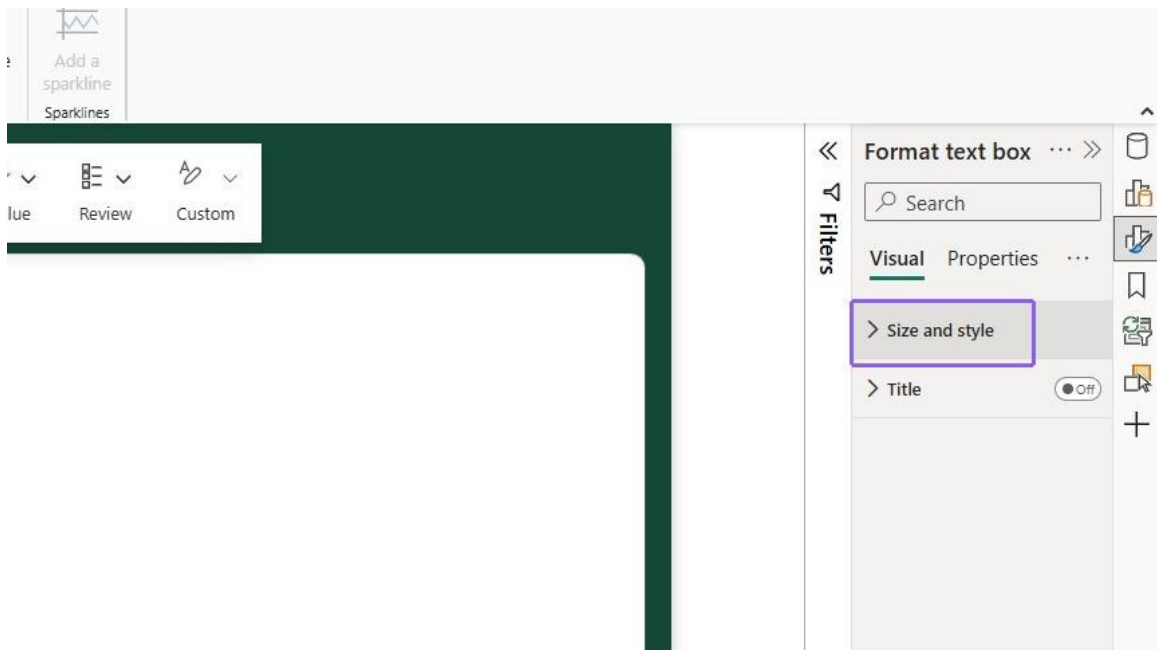

22. Place the text box on the top

23. Switch off the Title

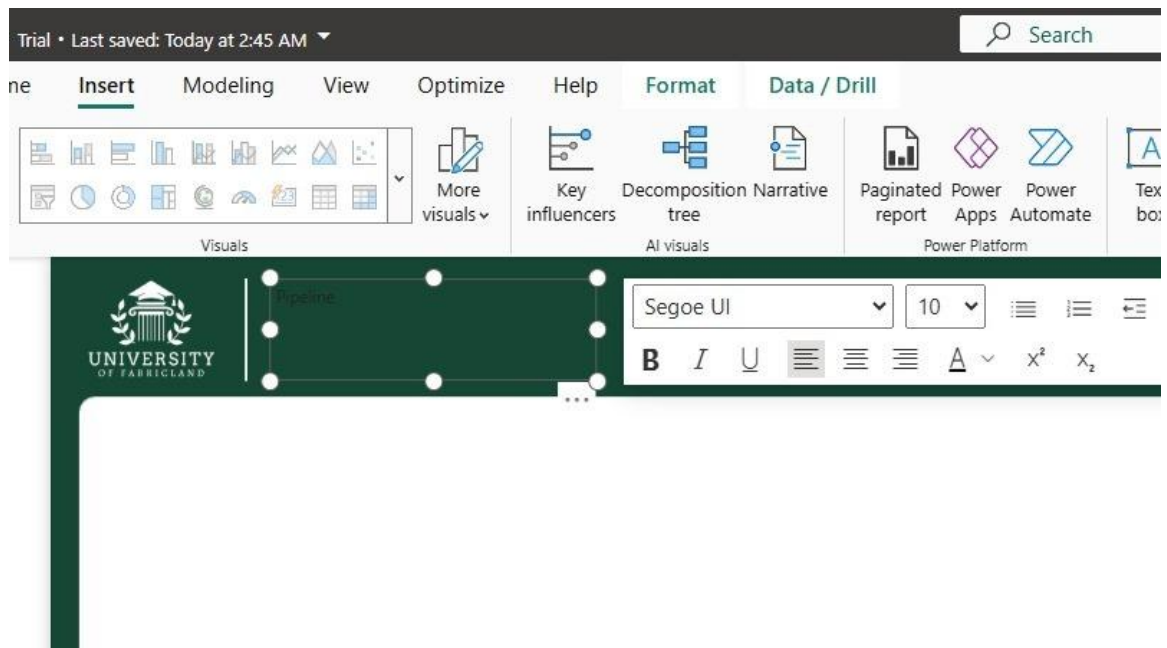

24. Click "Size and style"

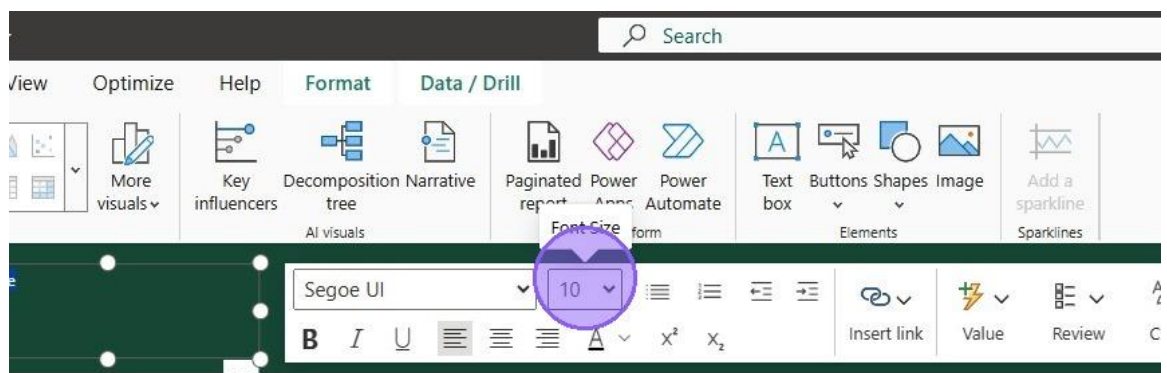

25. Switch off the background

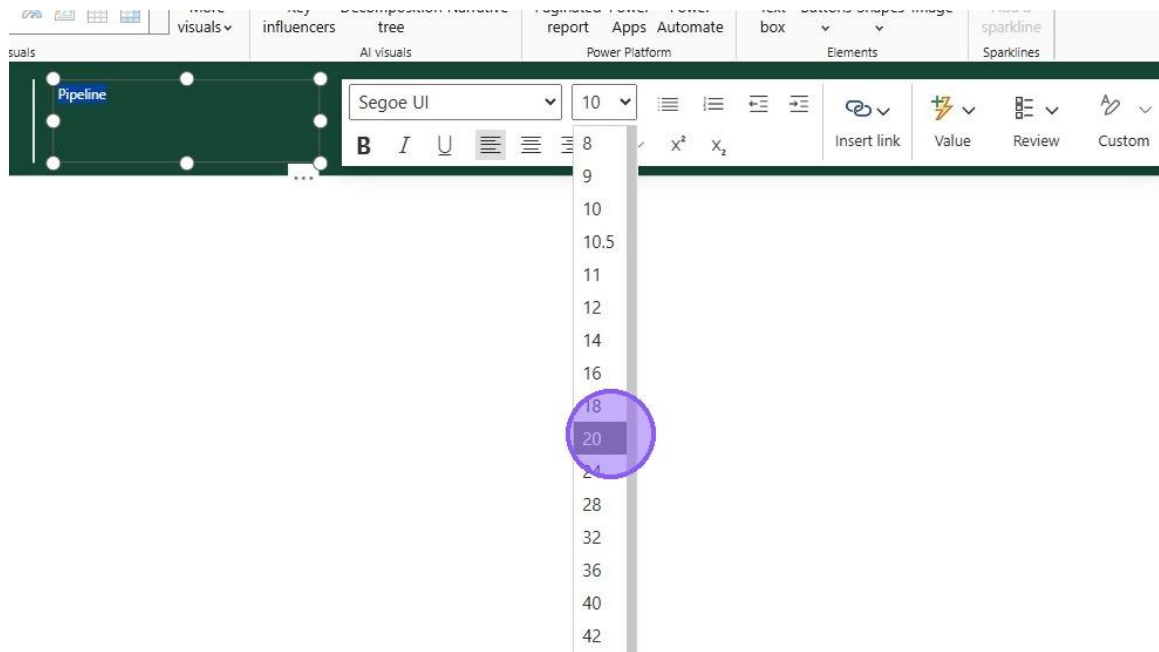

26. In the textbox, type "Pipeline"

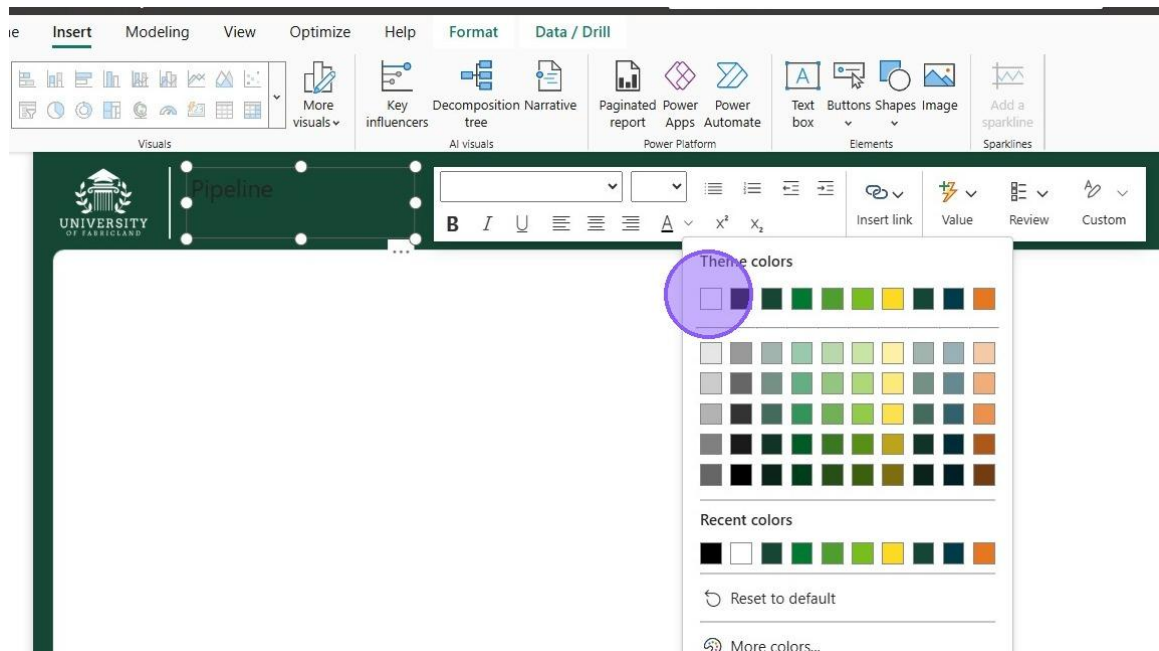

27. Select the text and Click "Font Size"

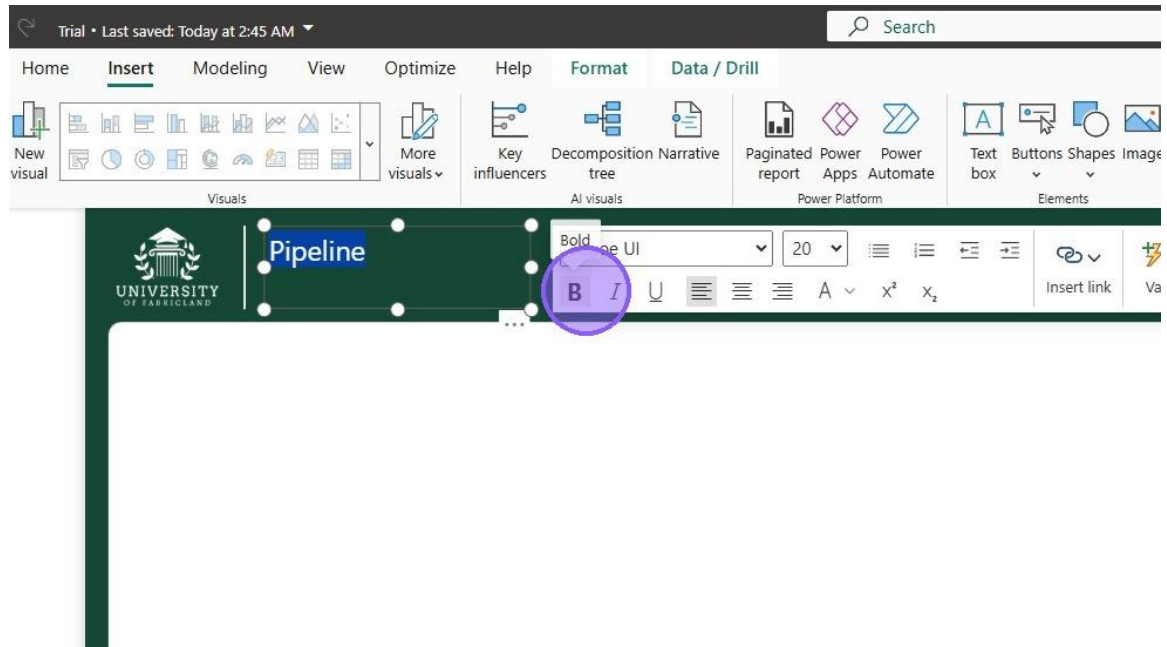

28. Choose 20

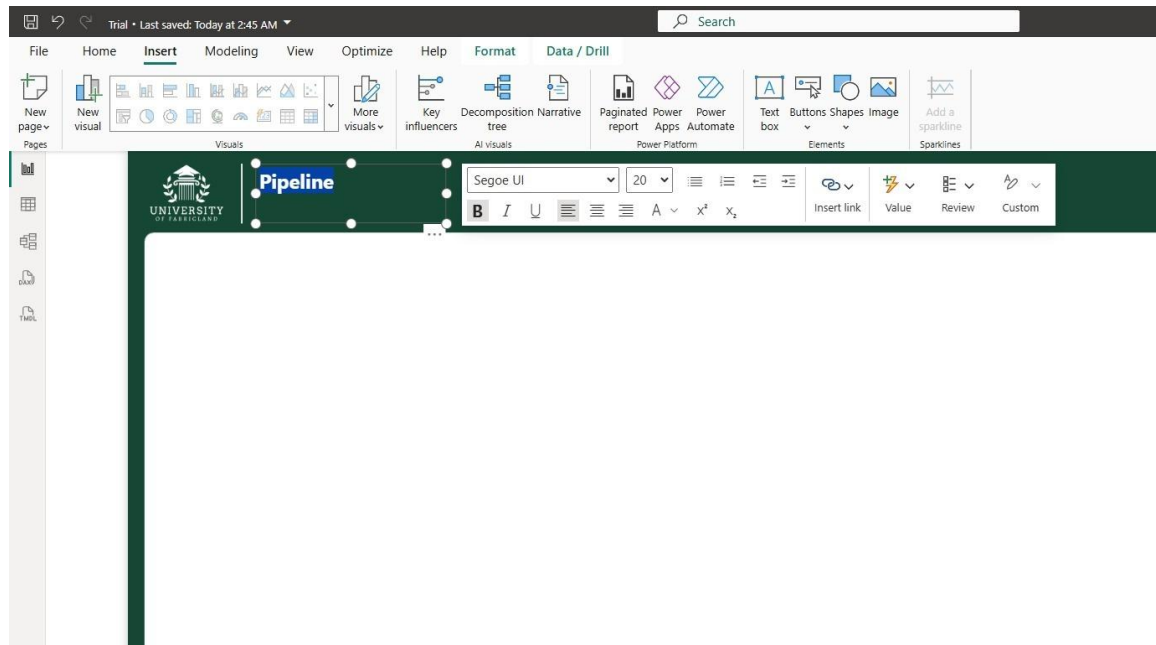

29. From the color dropdown, Click "White"

30. Click "Bold"

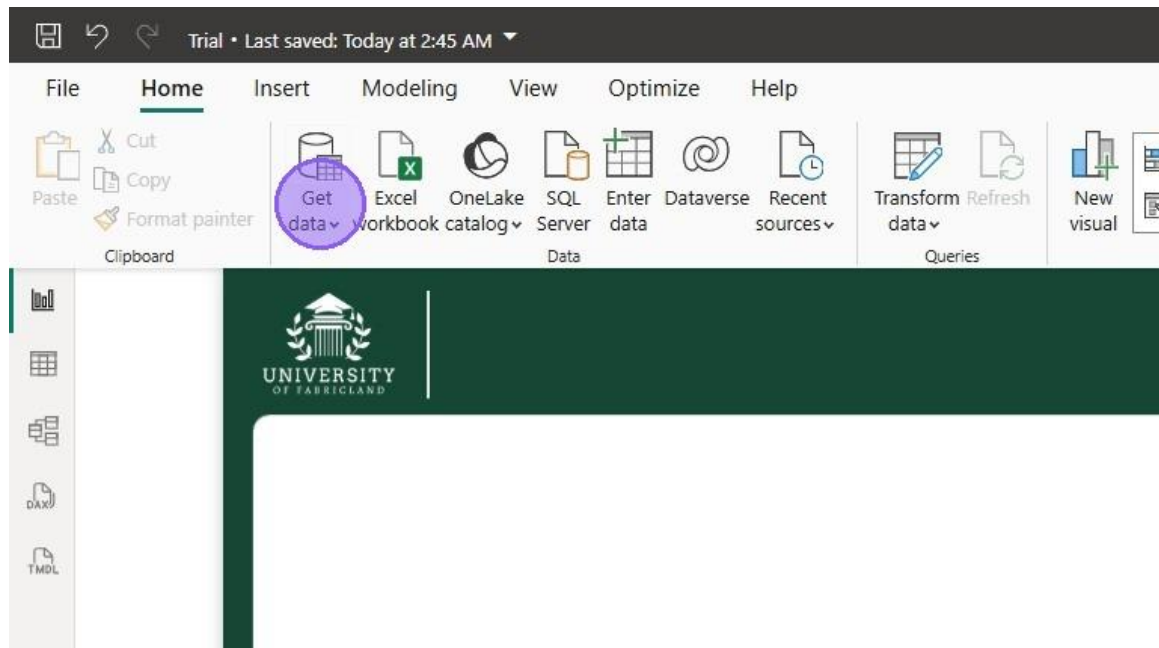

31. Header is ready!

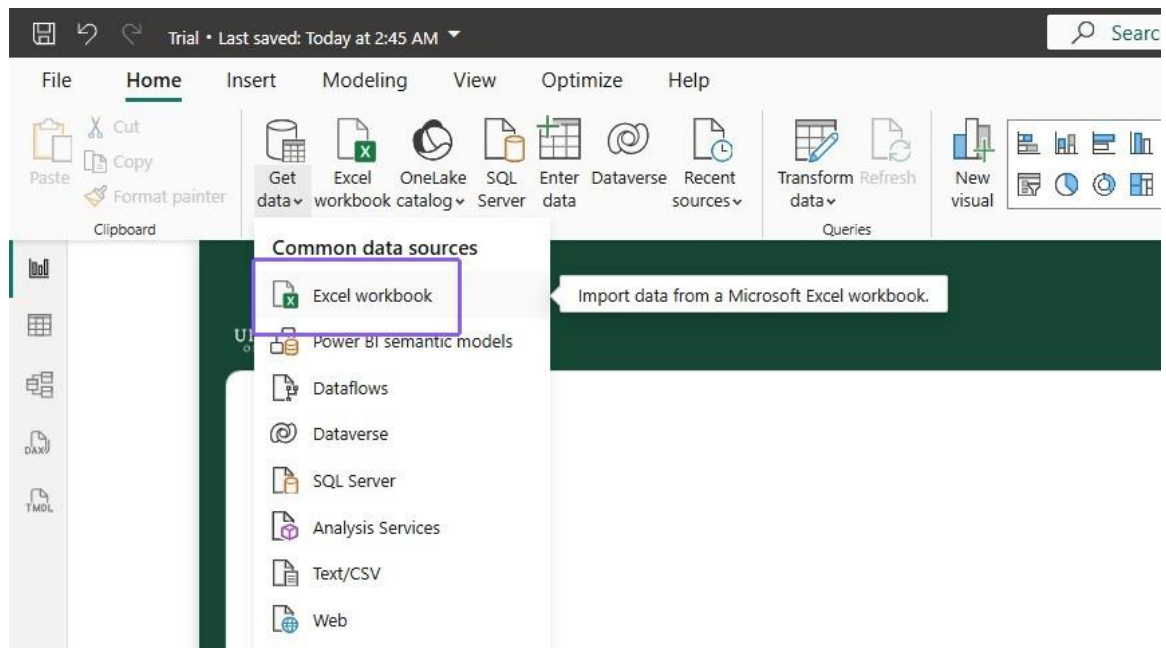

Load the Data

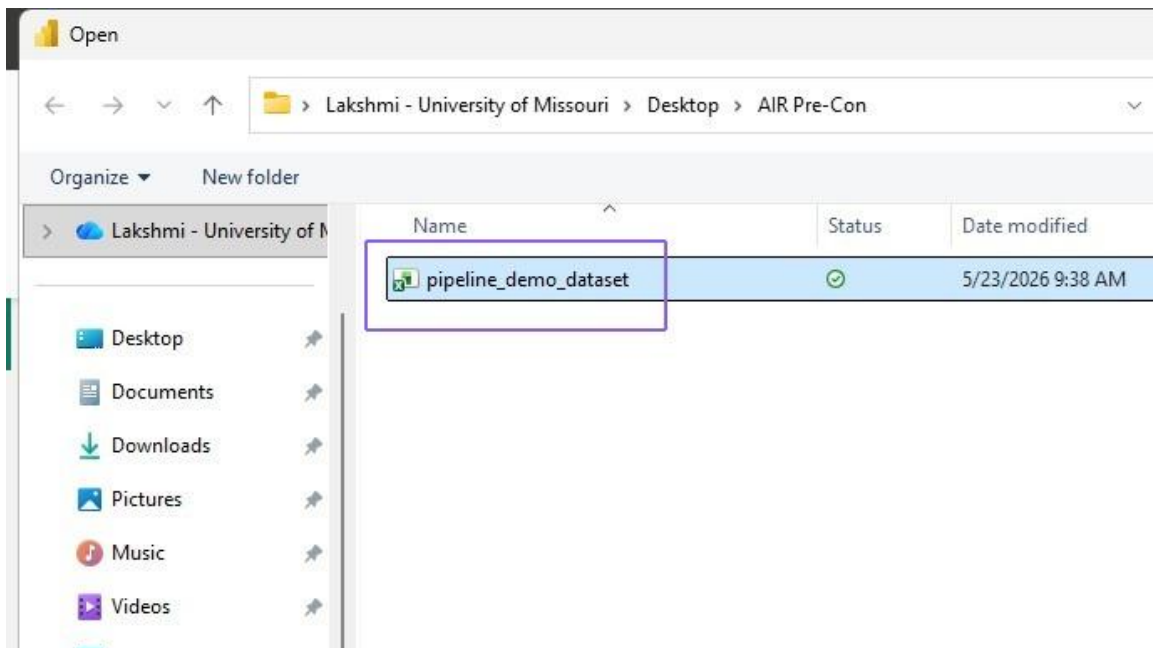

32. Click "Get data"

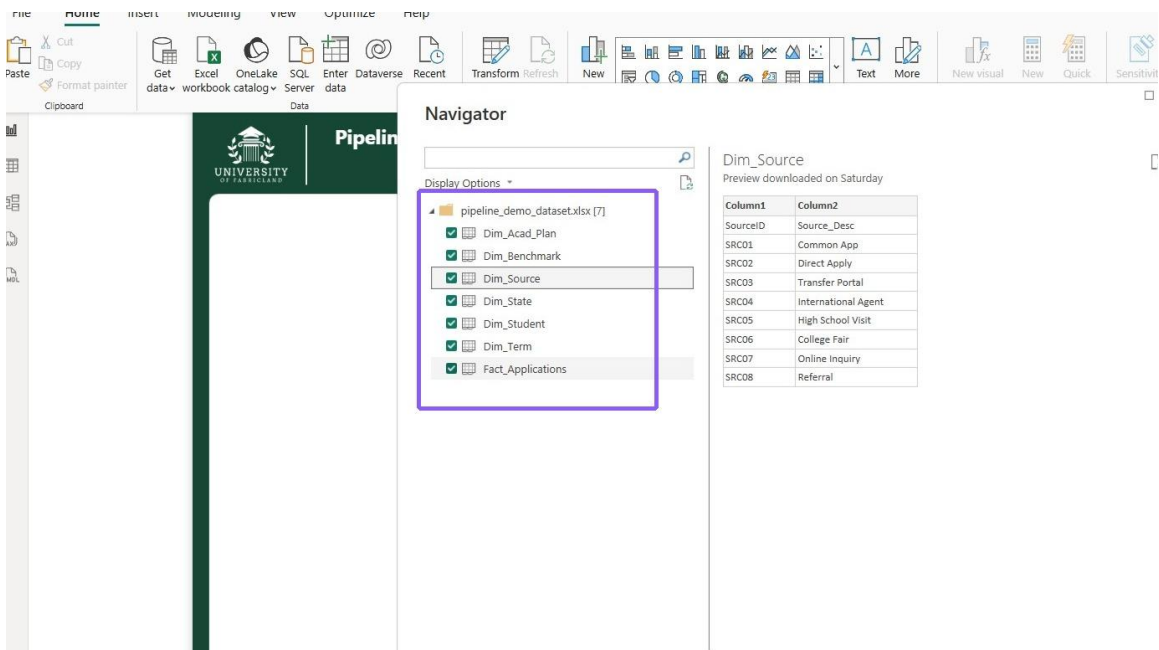

33. Click "Excel workbook"

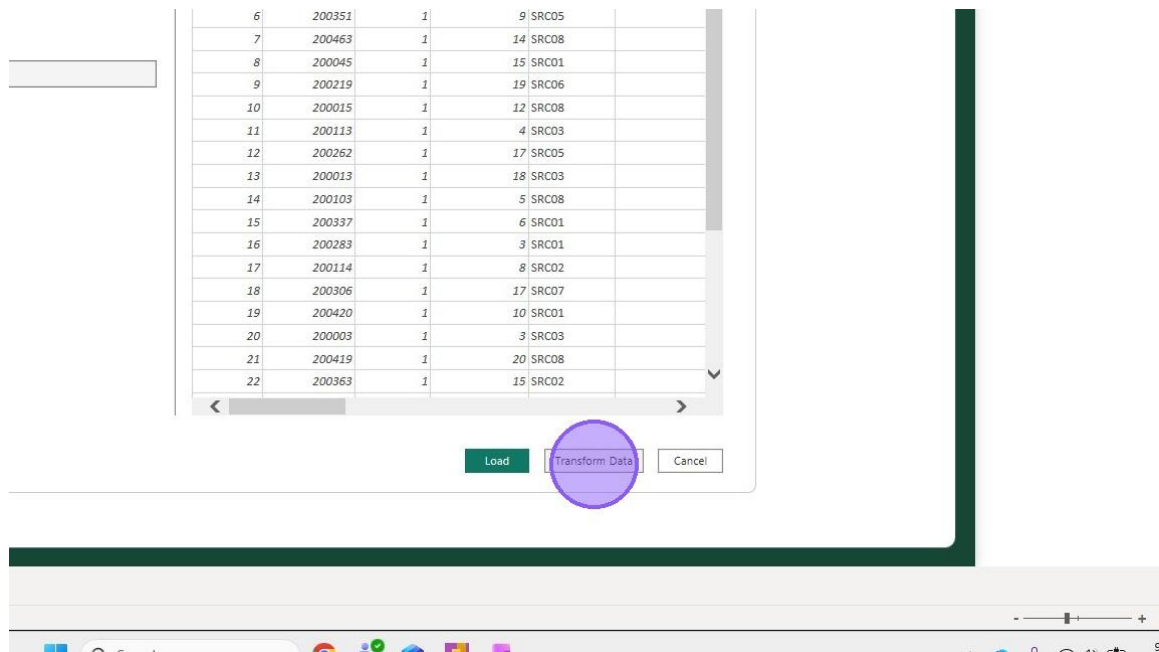

34. Select the dataset

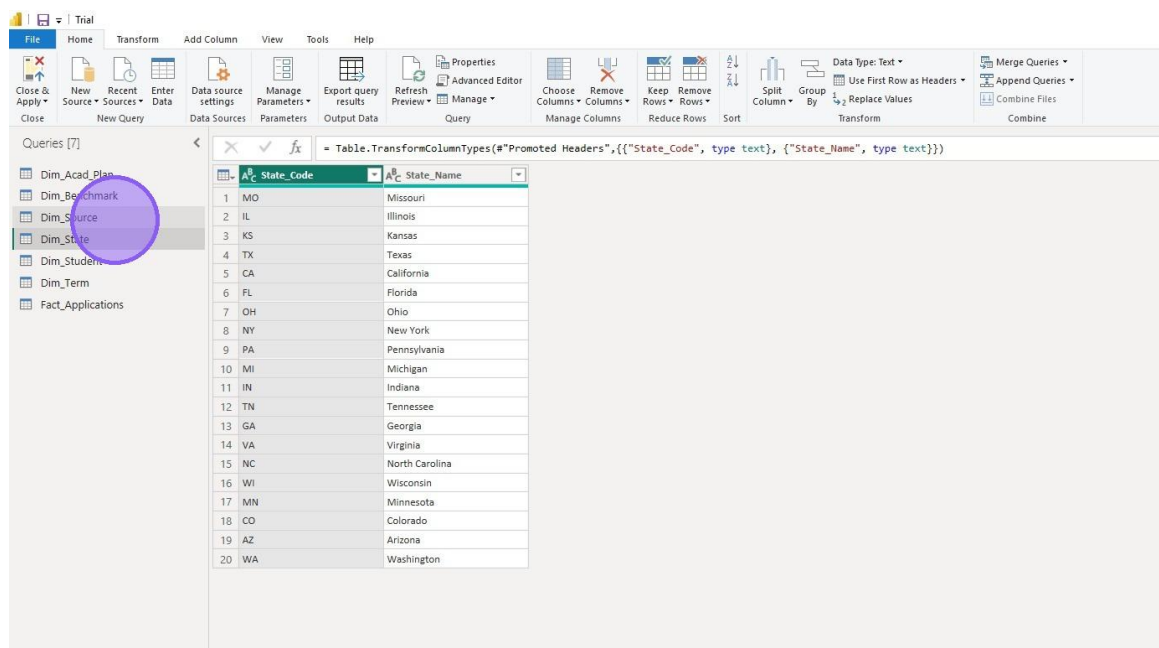

35. Select all the tables

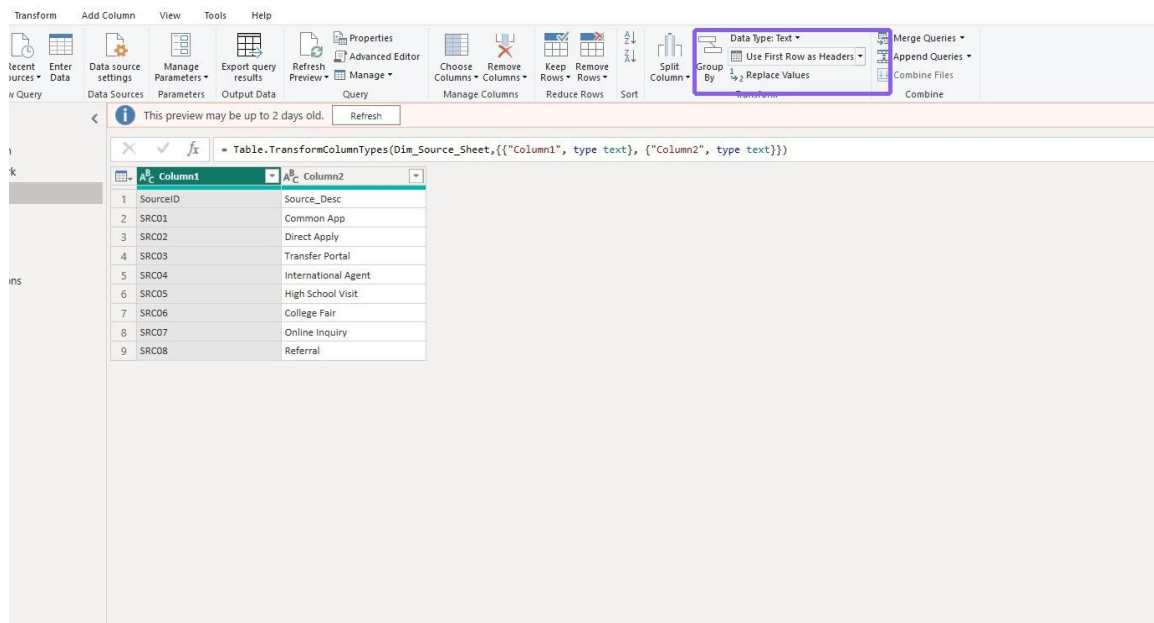

36. Click "Transform Data" after selecting all the table! (Do not directly click Load) (If you do click load, select "Transform Data" from the home tab)

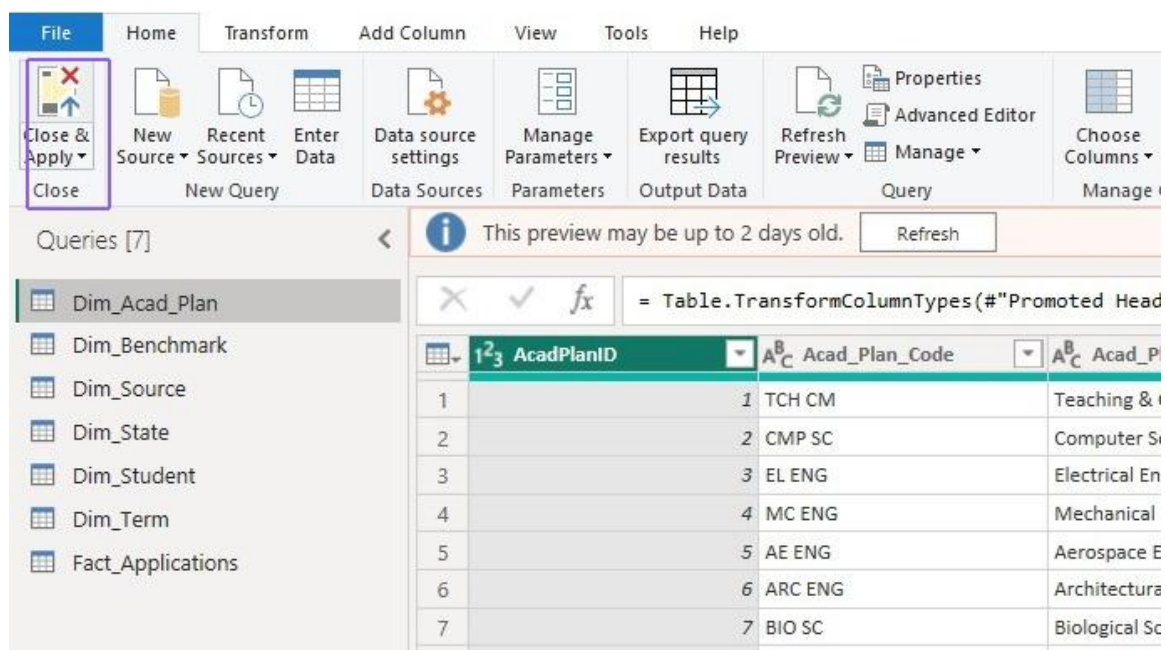

37. Click on each table and take a look at the data

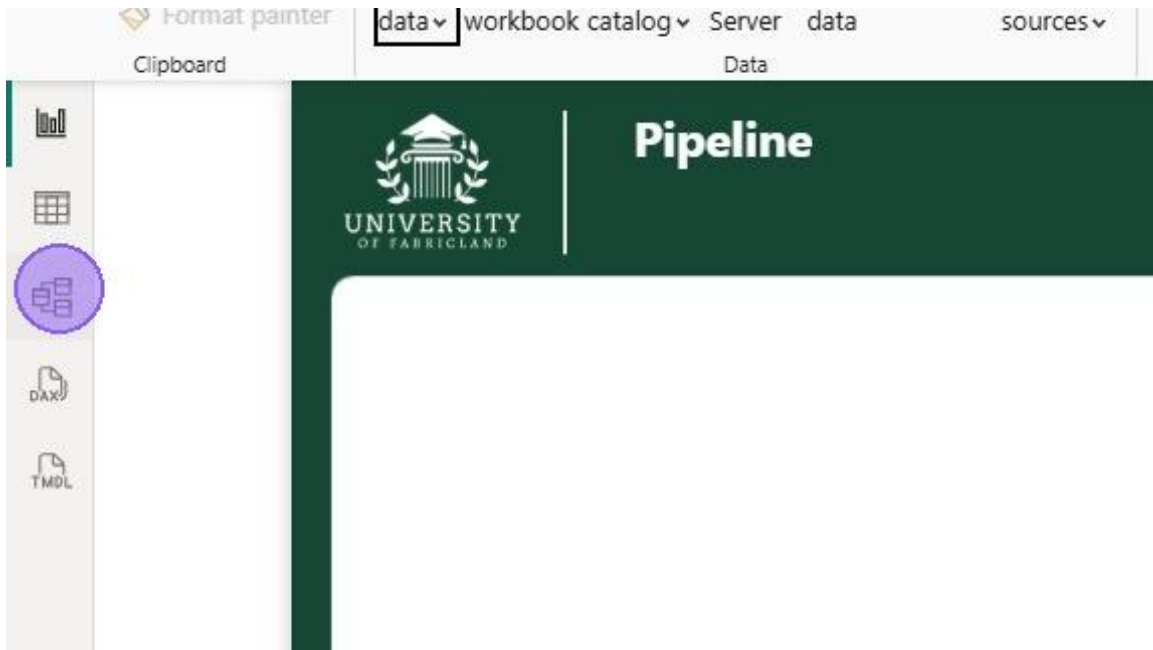

38. When you see that the column headers in the table are incorrect, select the table and then Click "Use First Row as Headers"

39. After verifying your data, Click "Close & Apply"

40. Click "Model view" to take a look.

41. You should see something like this! A Star schema.
