

3. Adding slicers

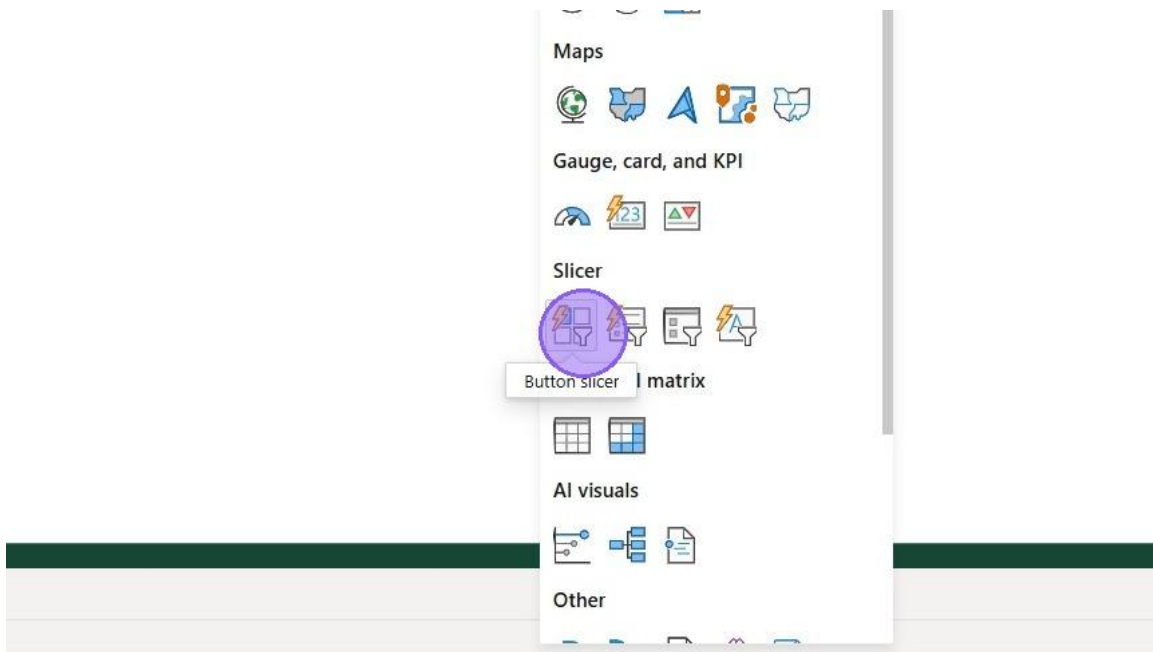

Learn how to customize the appearance and behavior of a button slicer within Power BI to enhance your report interactivity. This guide covers formatting options, including background colors, state-specific settings, and font adjustments for a professional finish.

Visual Creation

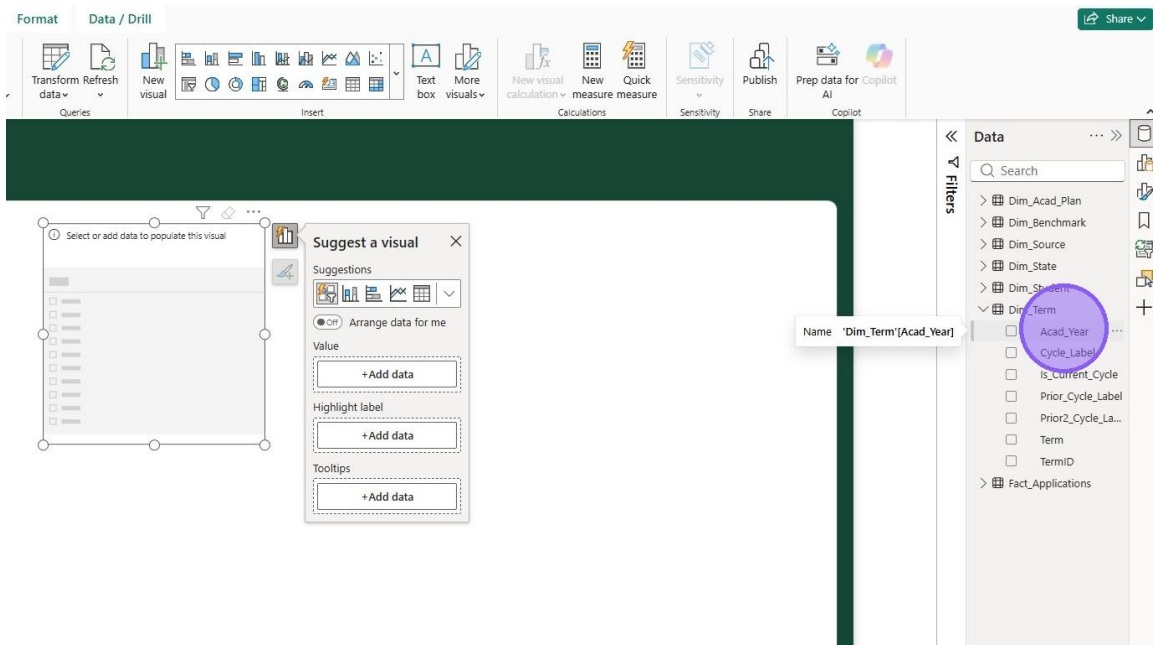

1. Click "Visual gallery"

2. Click "Button slicer"

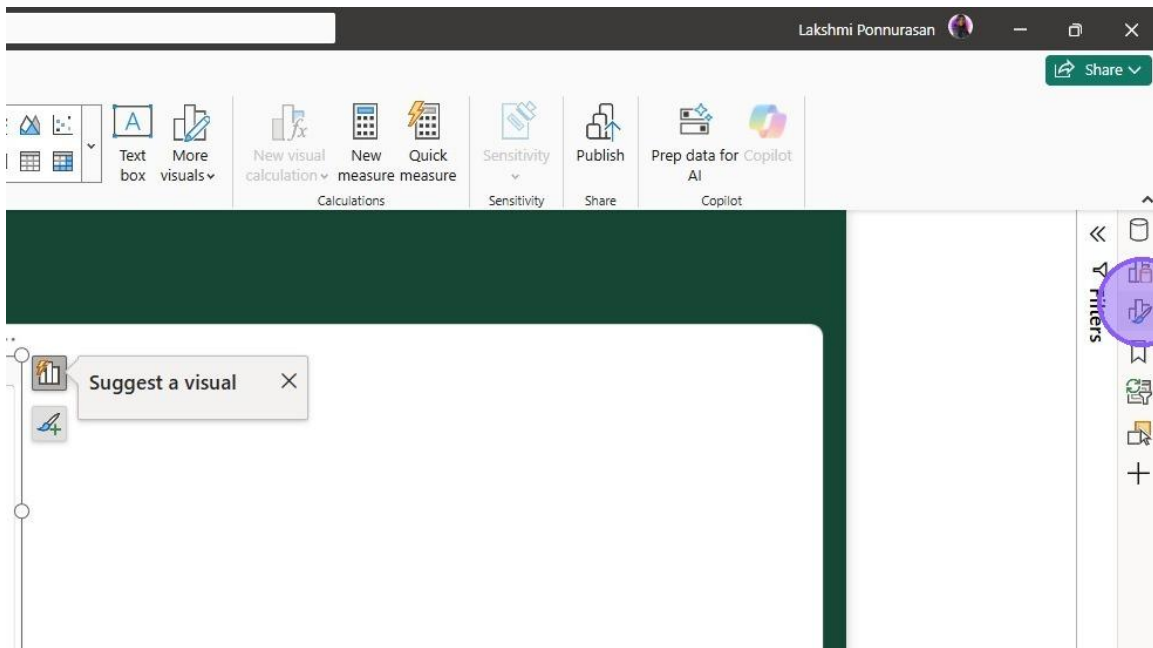

3. Select 'Acad_Year' from the Dim_term table to populate the slicer

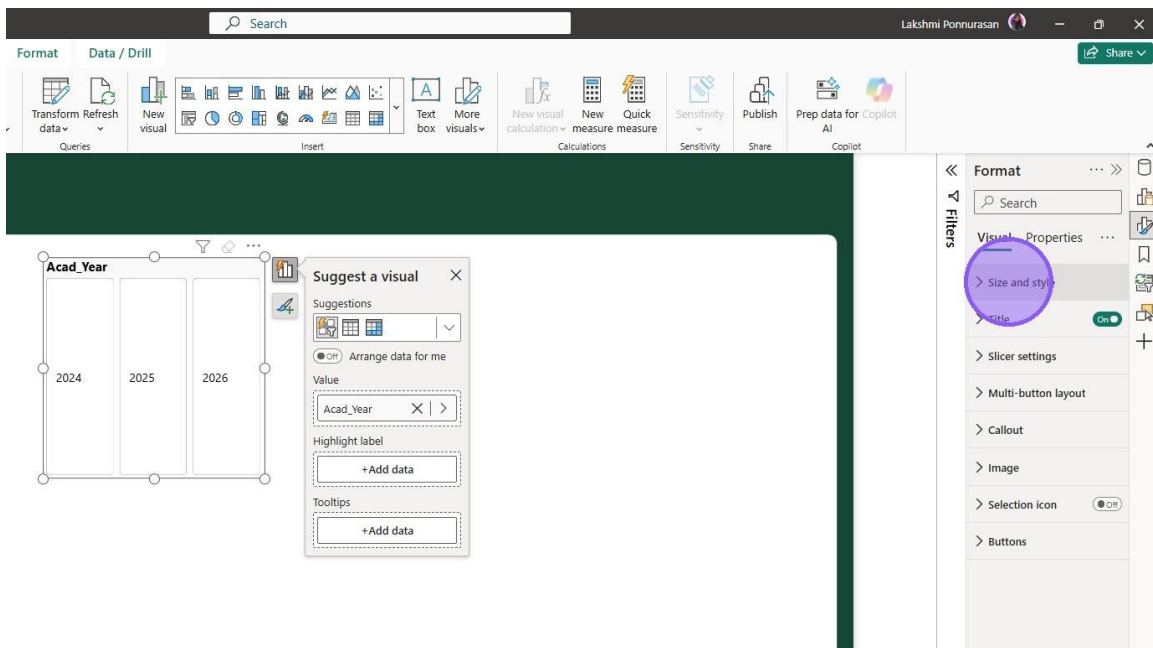

Visual Layout and Style

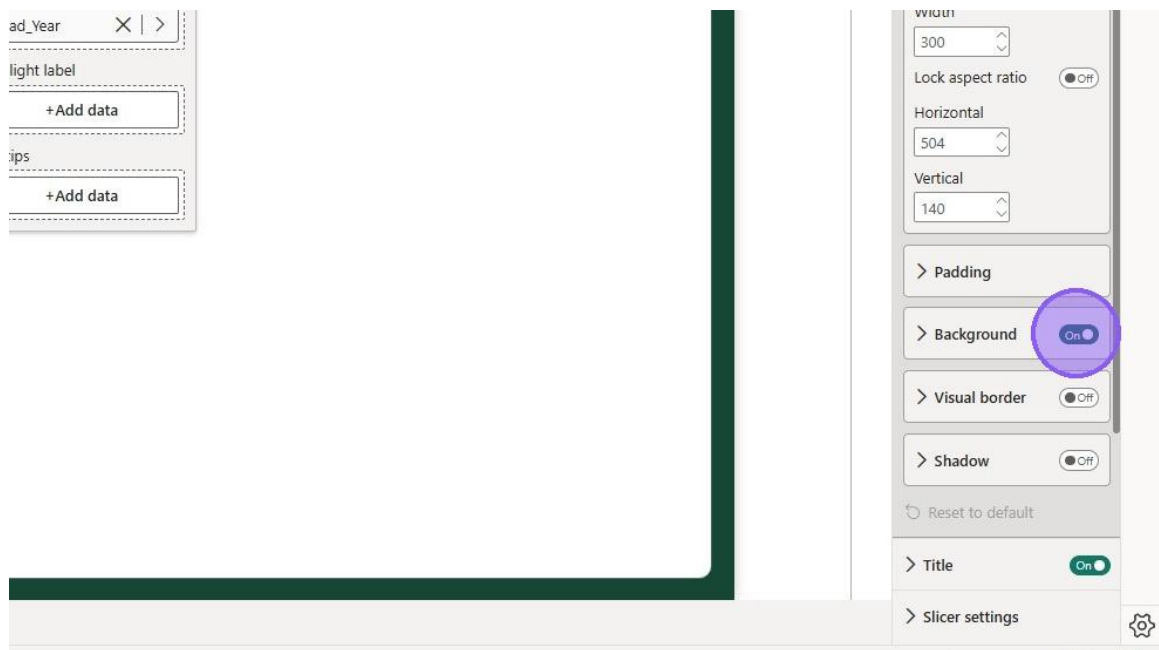

4. Open the Format pane for the selected visual

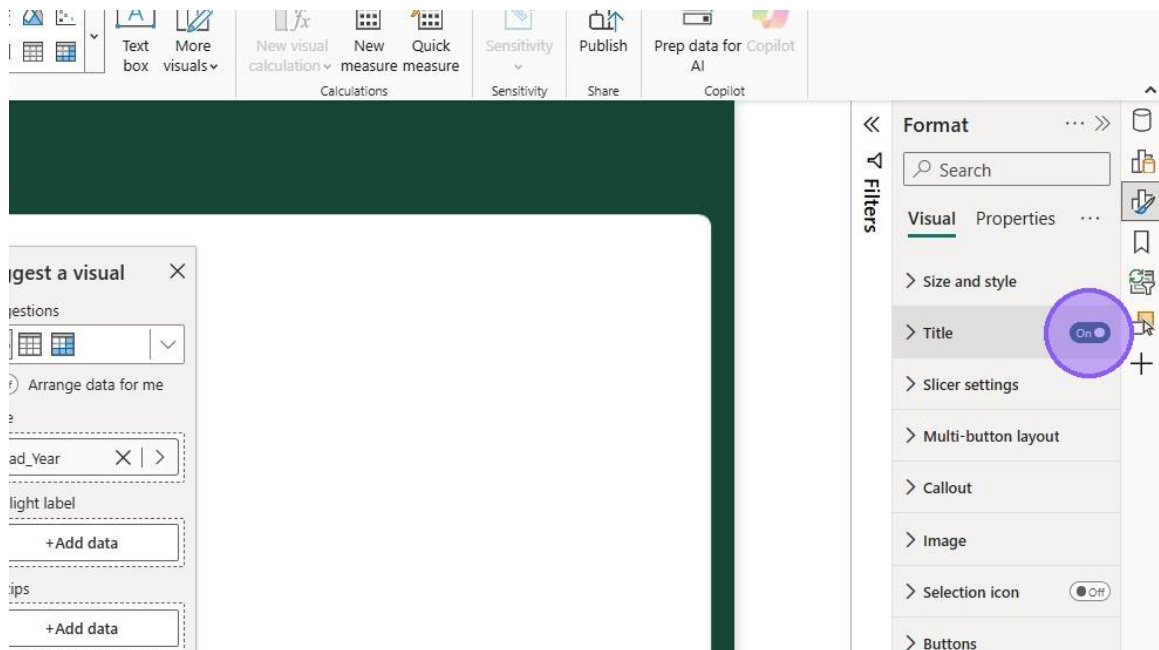

5. Expand 'Size and style' in the Format pane

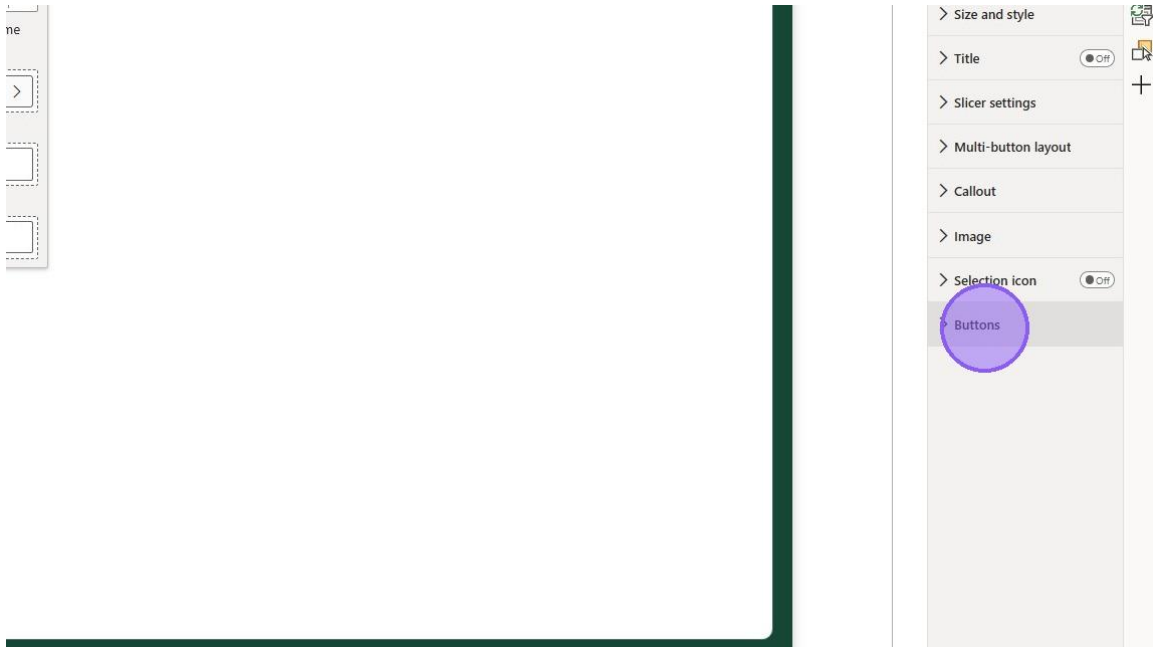

6. Click "On"

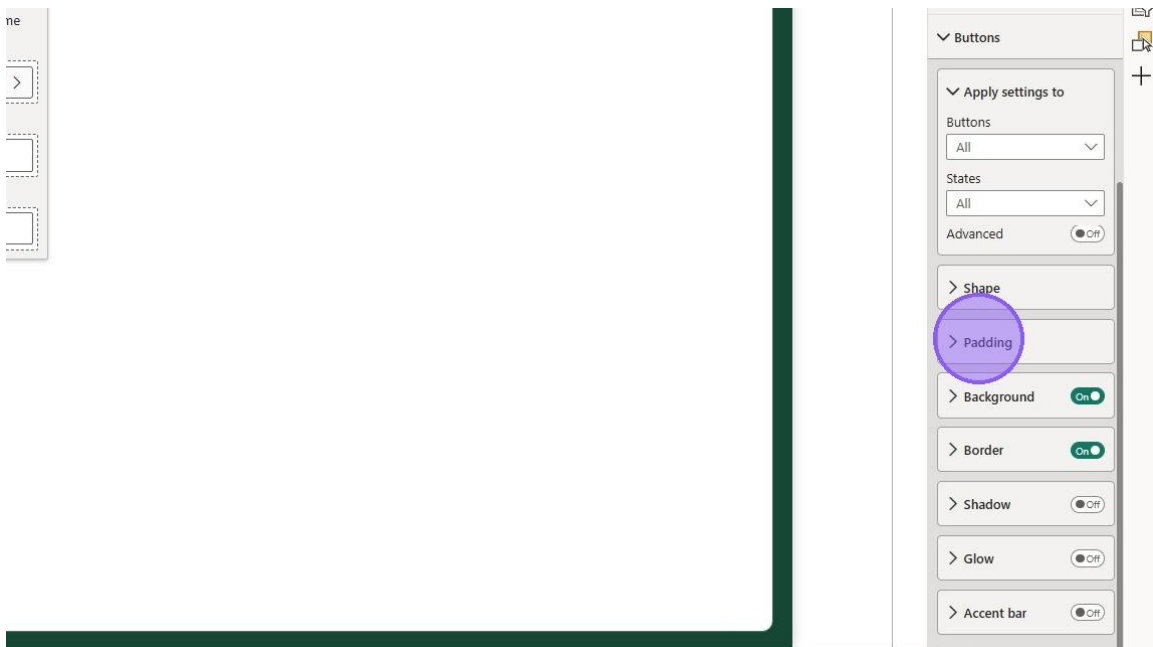

7. Switch off the title

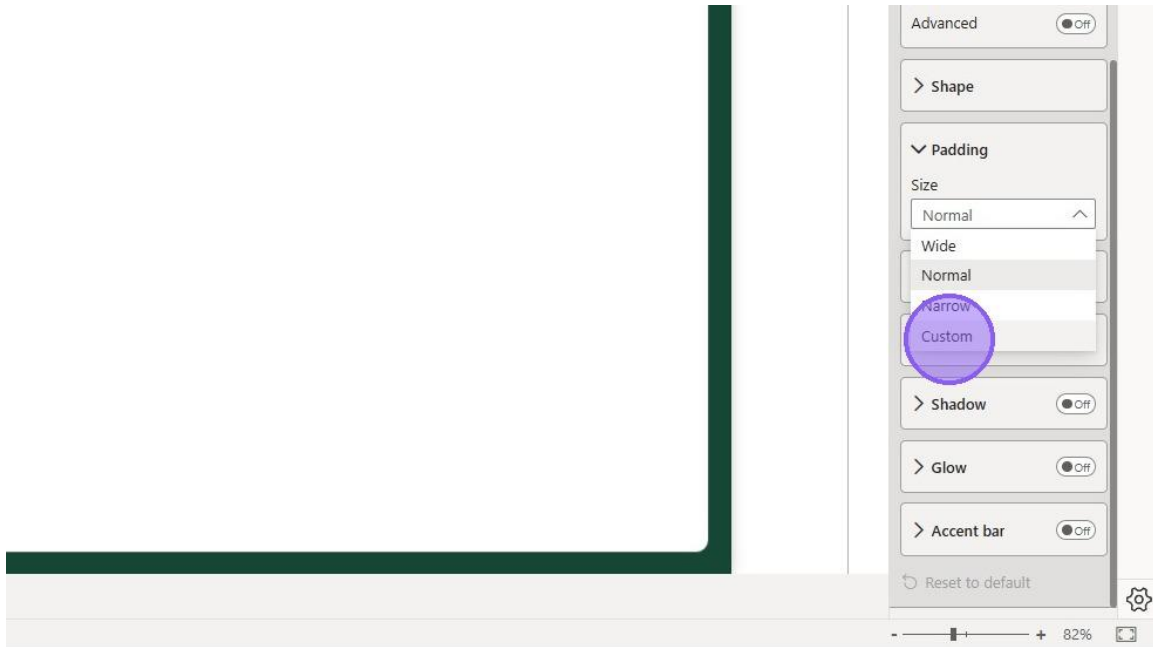

8. Click "Buttons"

9. Click "Padding"

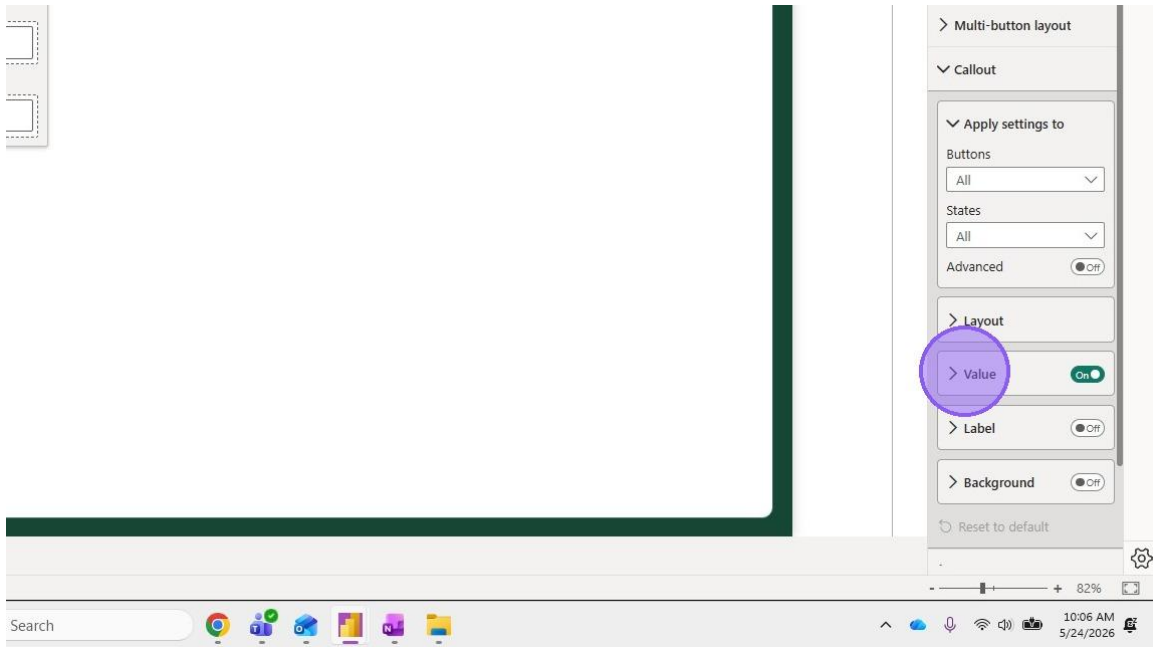

10. Select 'Custom' from the Padding size dropdown. And set everything to 0 px

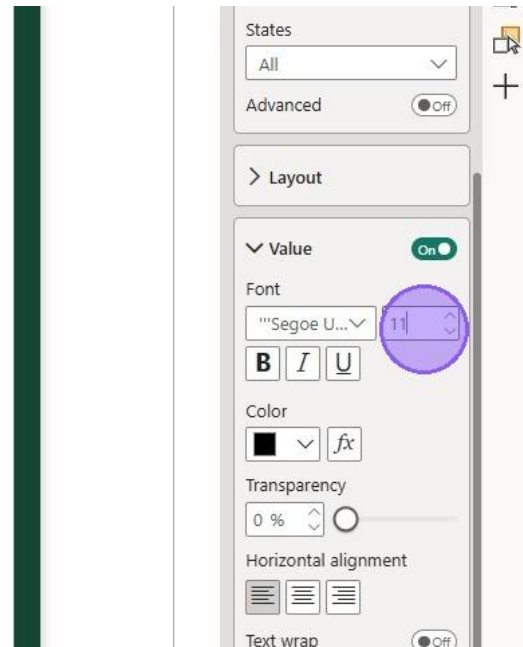

11. Click "Callout"

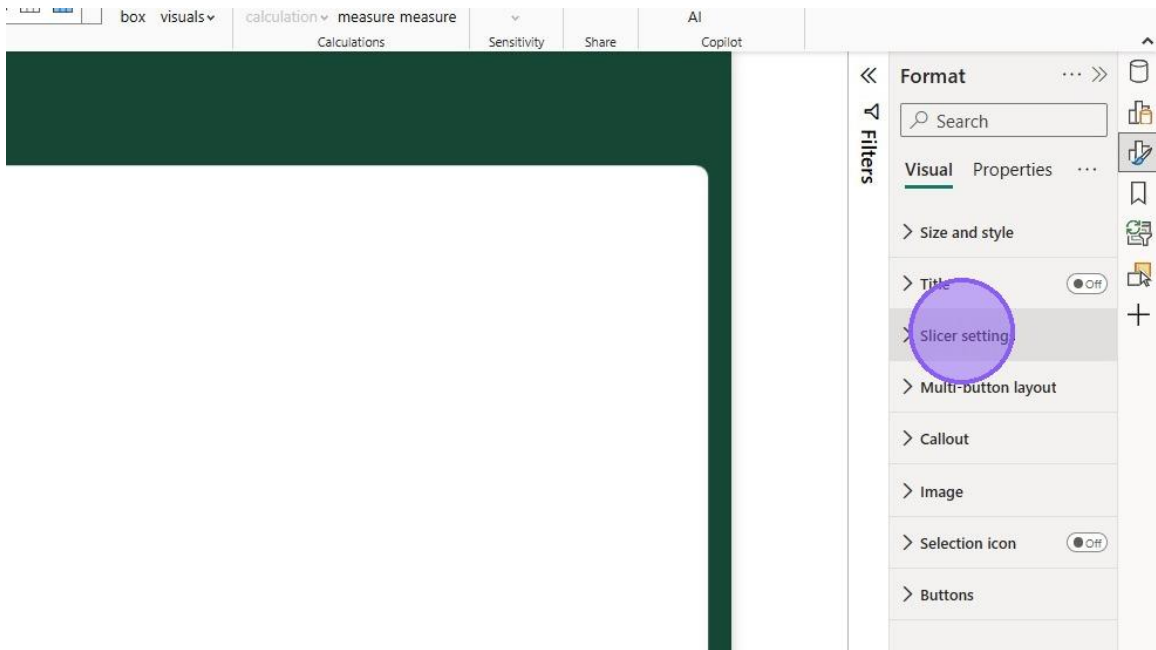

12. Click "Value"

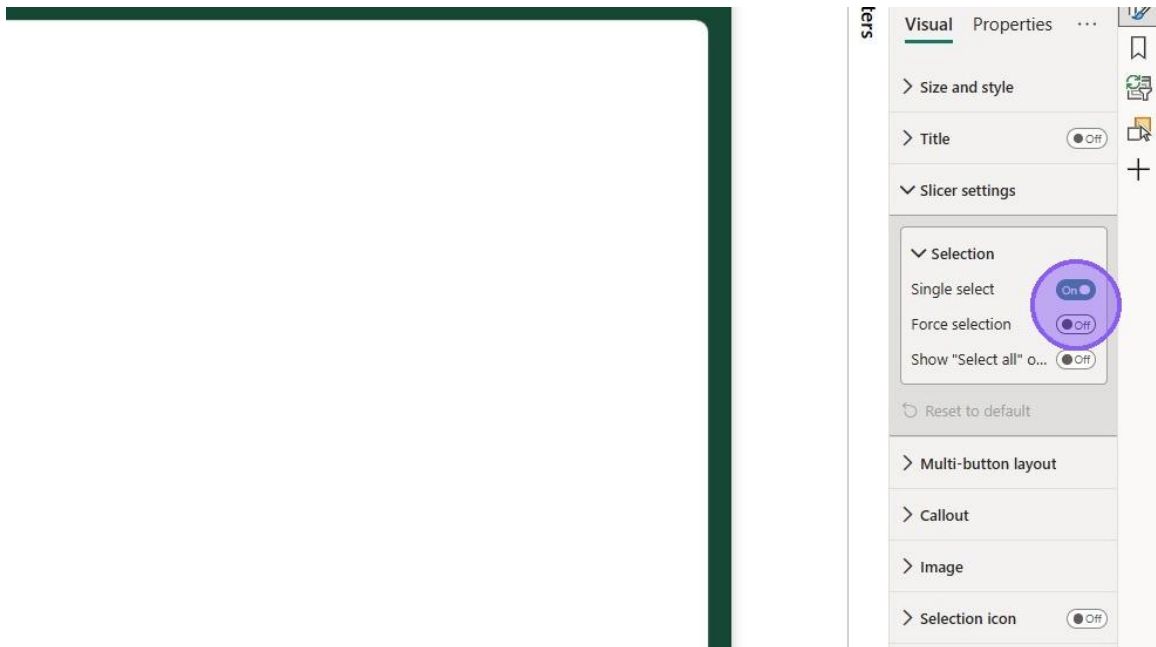

13. Click "Font Size" and adjust it to 11

14. Click "Slicer settings"

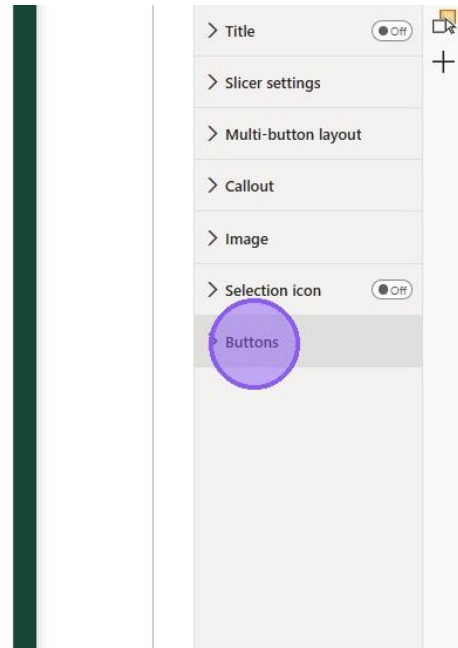

15. Make sure Single select and Force selection is ON

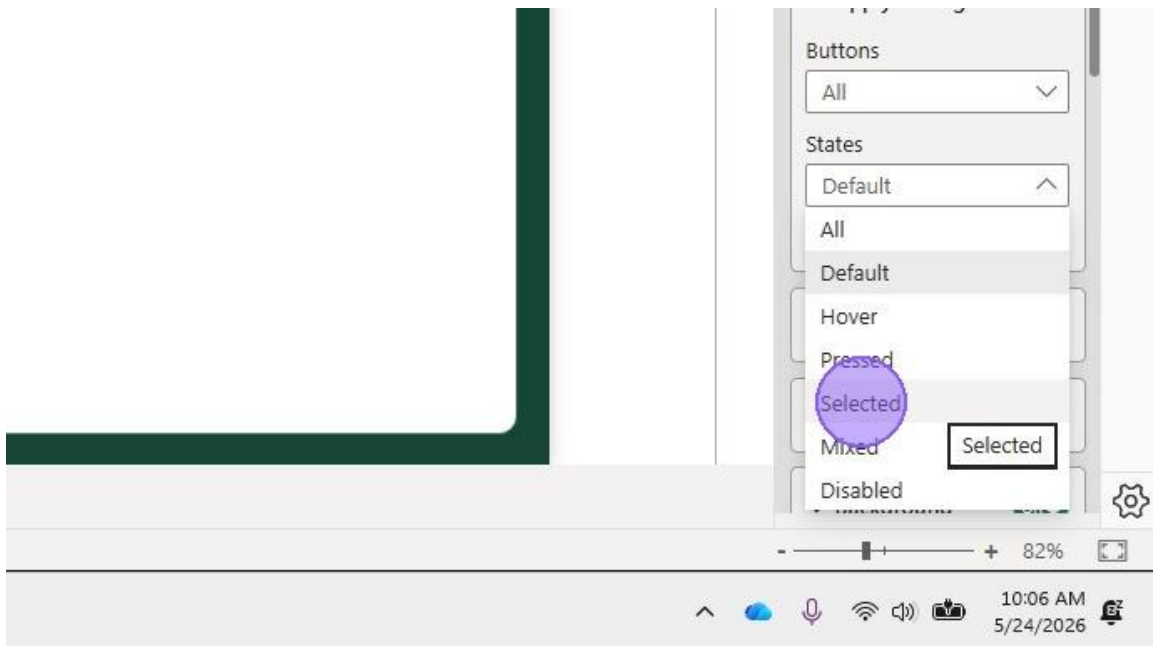

Additional State Formatting

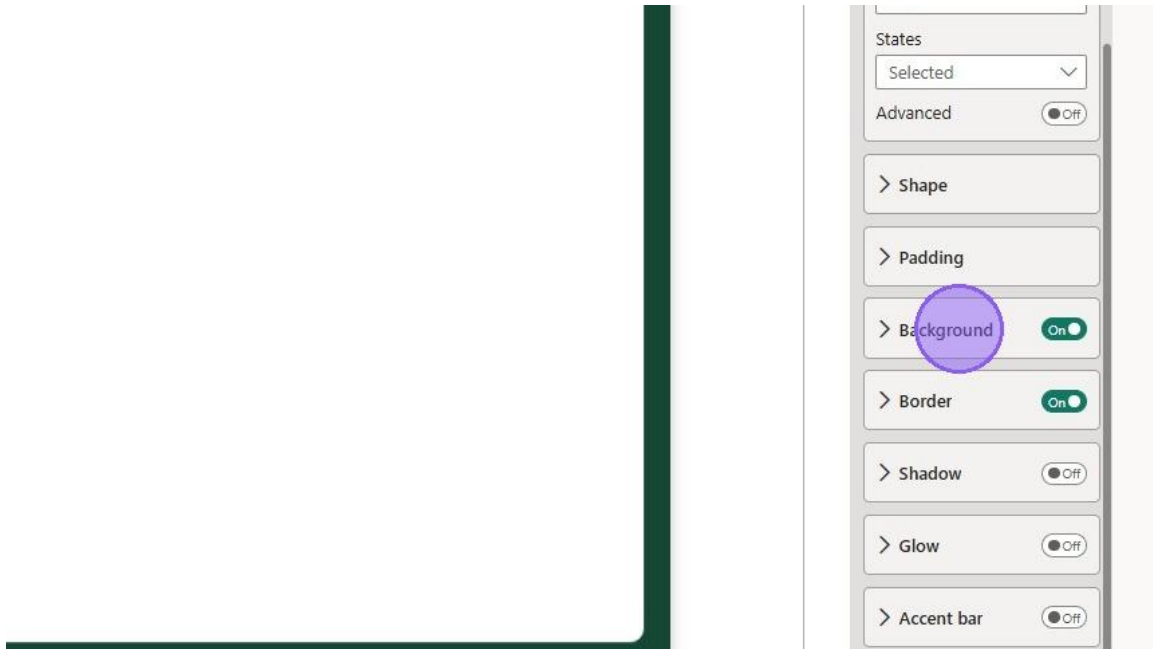

16. Click "Buttons"

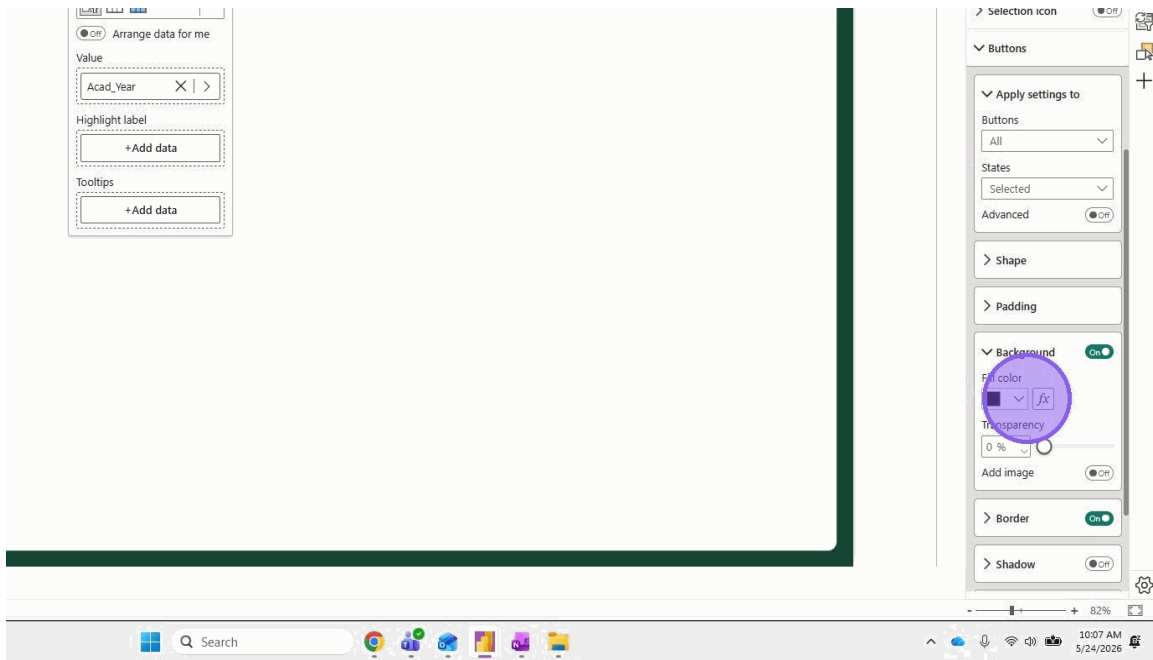

17. Click "Selected"

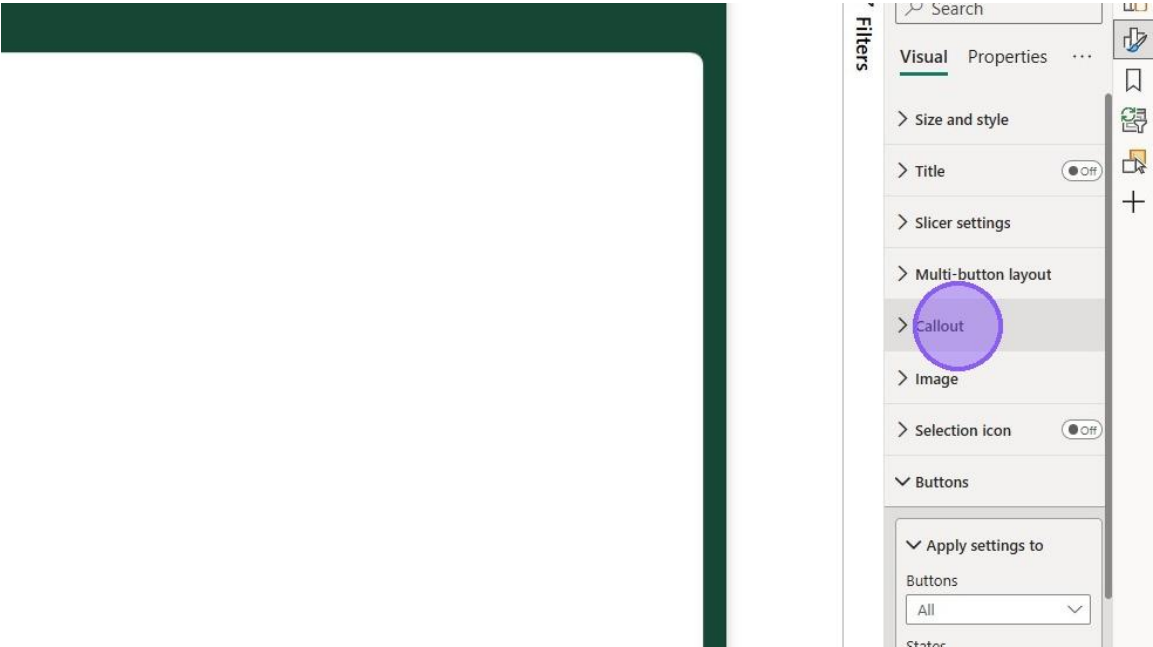

18. Click "Background"

19. Set the Background Fill color for the 'Selected' state to green (#78BE20)

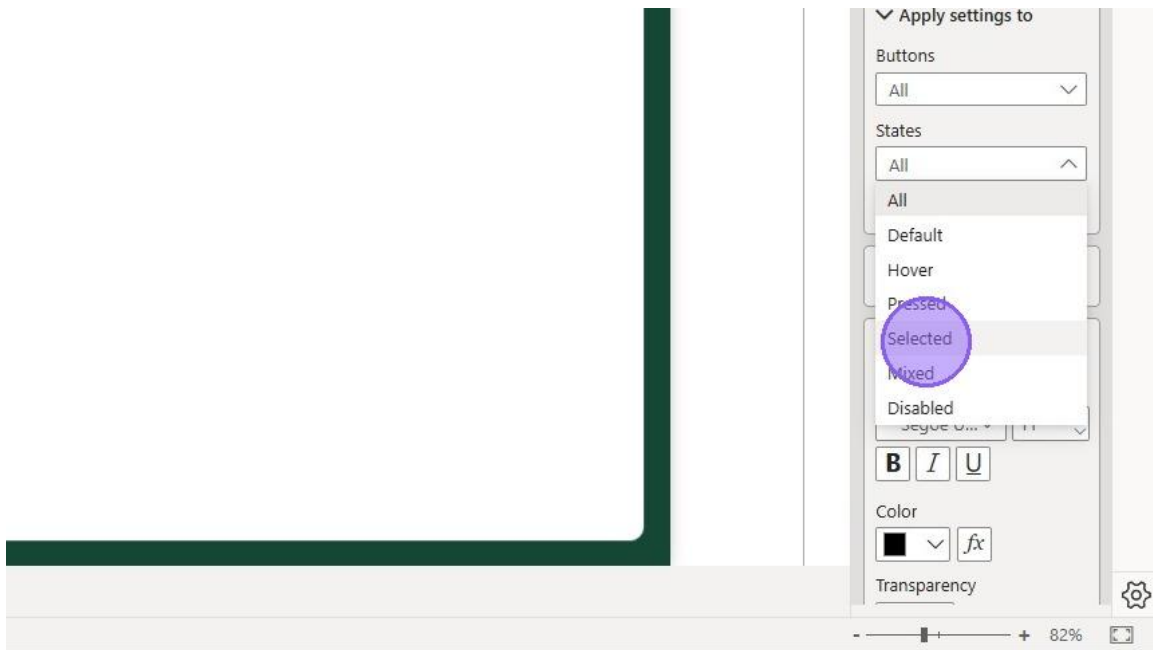

20. Click "Callout"

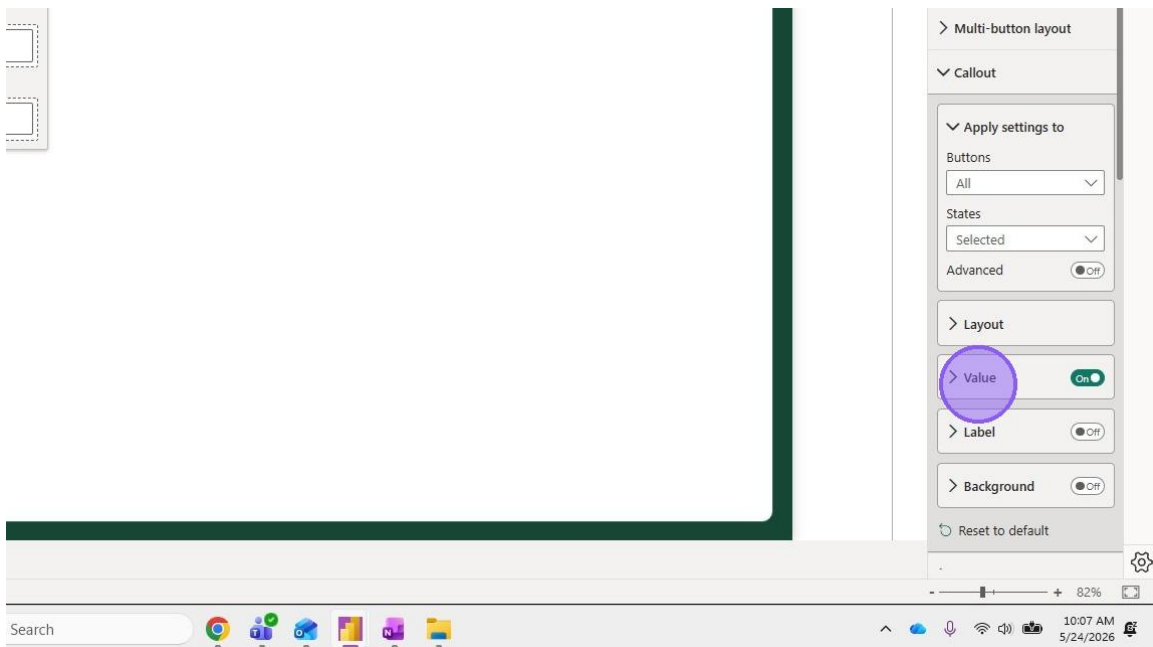

21. Click "States "

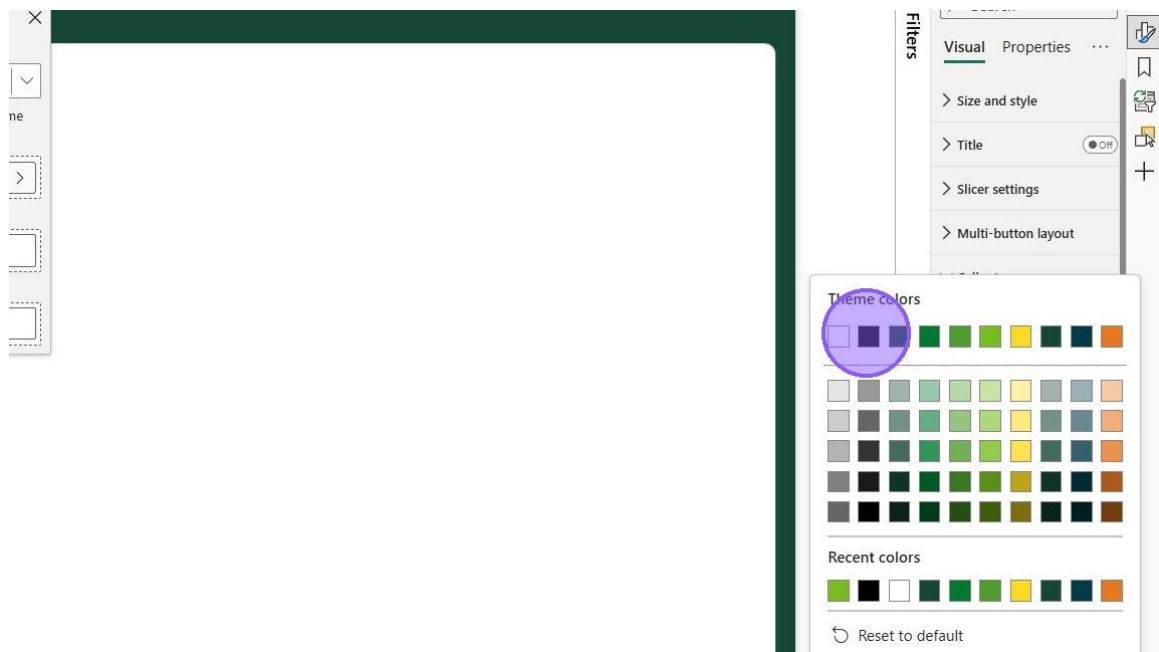

22. Click "Selected"

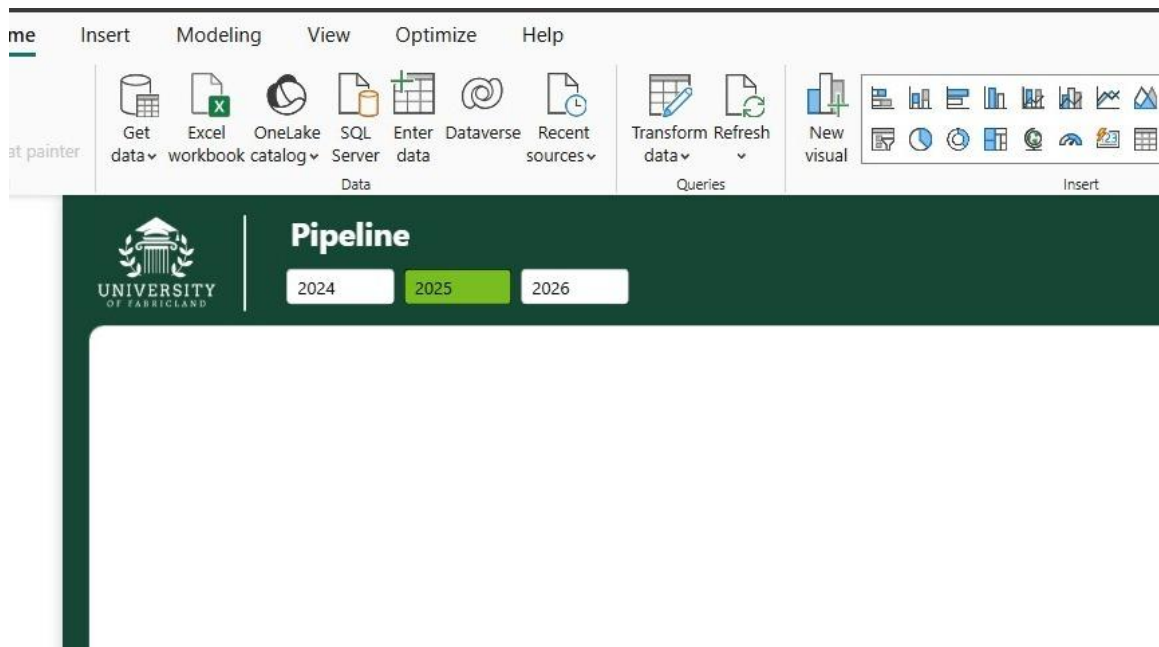

23. Click "Value"

24. Click "Black" under color

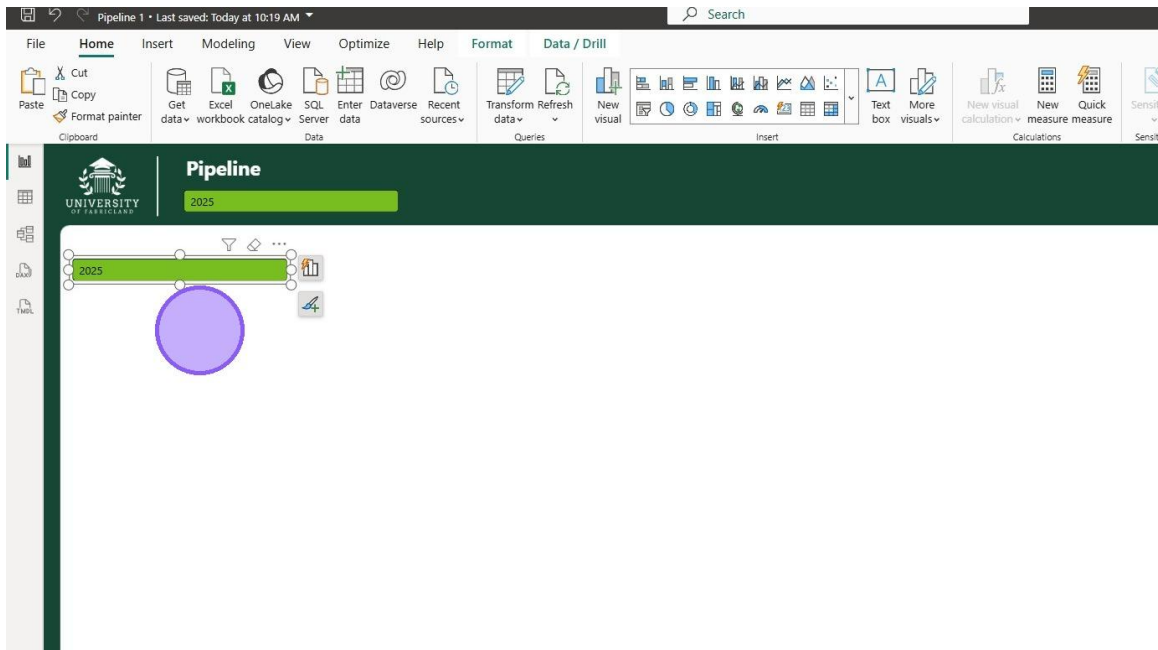

25. You should have something like this! Feel free to experiments with the button states

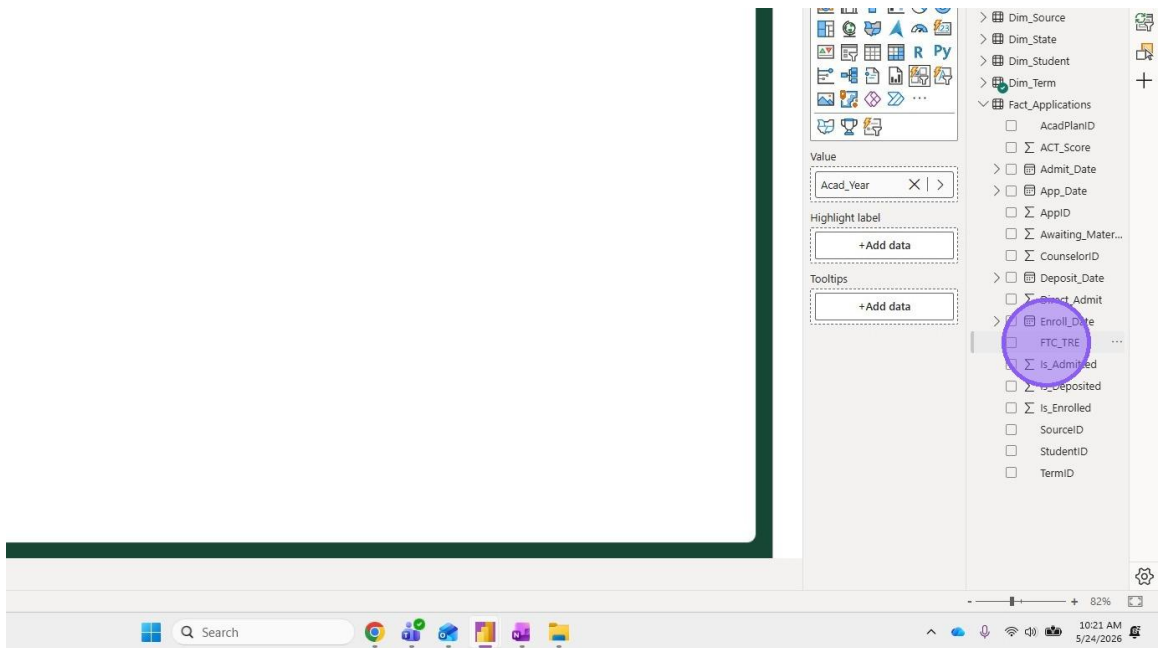

Adding more slicers

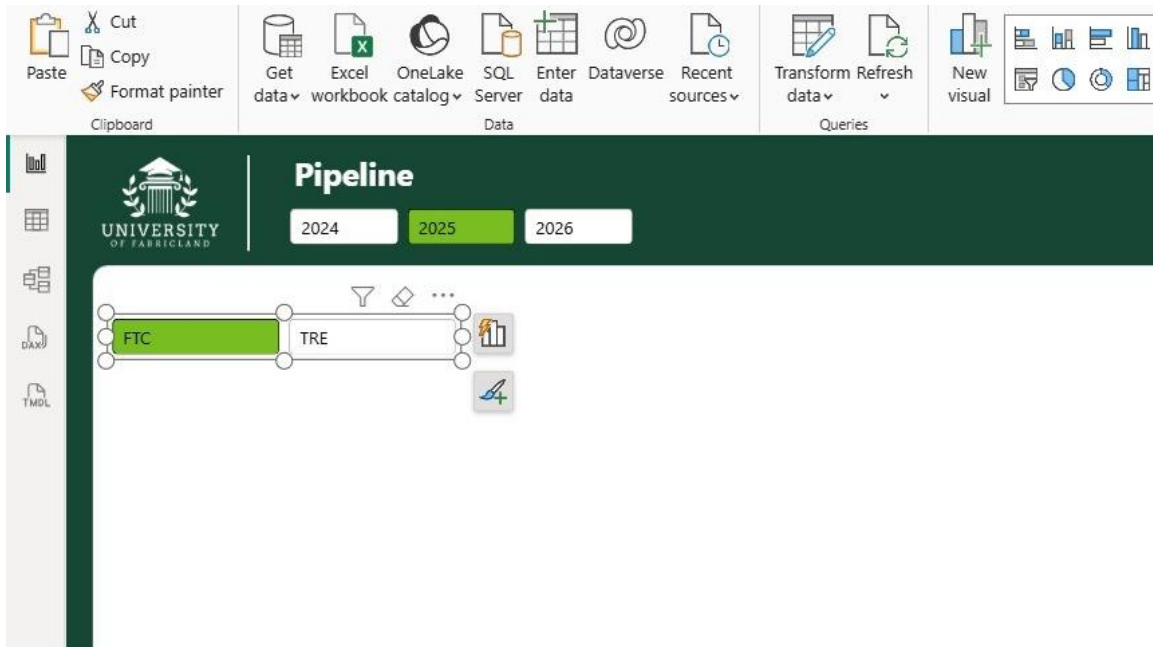

26. Copy paste the slicer

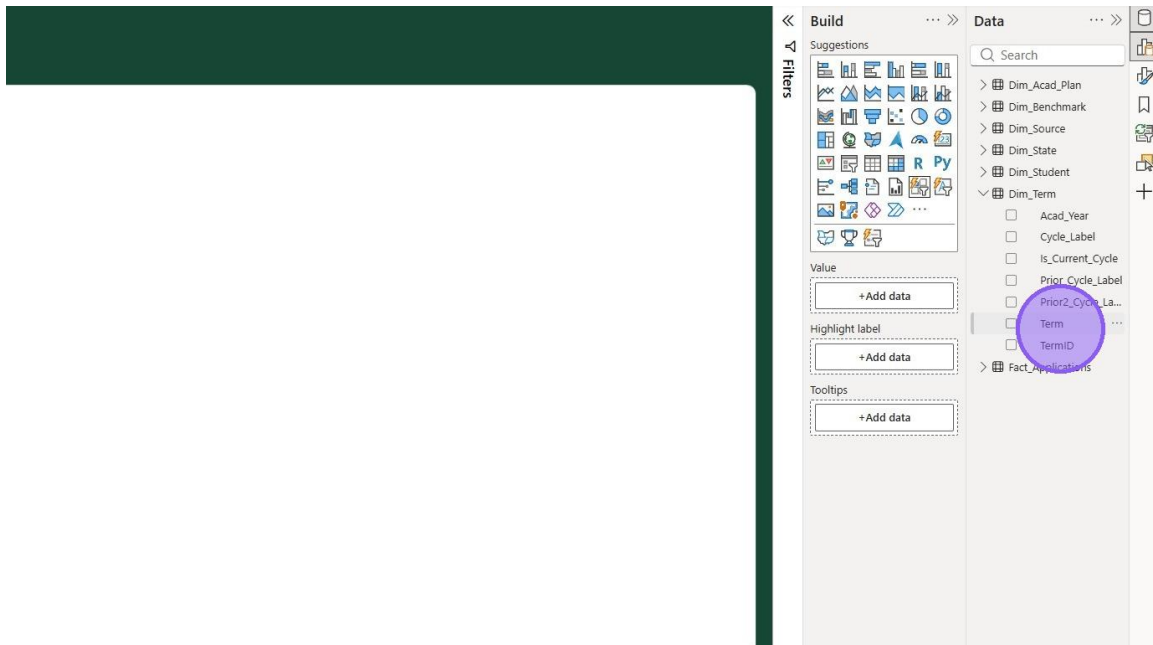

27. Replace the field value to FTC_TRE from the fact table

28. You should have something like this!

29. Copy paste this slicer and then replace field value to Term from the Dim_term table.

30. This is what you should have now! You can find everything till this step in the Pipeline 1 PBIX file
