

Benchmark Visuals

Learn how to effectively customize your gauge visualization settings to display benchmarks.

1. Add the below measures required

Admit Rate % =

`DIVIDE( [Admits #], [Apps #] )`

% Yield =

`DIVIDE( [Net Deposits #], [Admits #] )`

% A&R =

`DIVIDE( [Enrolled #], [Net Deposits #] )`

Admit Rate Benchmark =

`LOOKUPVALUE(
Dim_Benchmark[Admit_Rate_Benchmark],
Dim_Benchmark[Acad_Year], MAX(Dim_Term[Acad_Year]),
Dim_Benchmark[Term], MAX(Dim_Term[Term]),
Dim_Benchmark[FTC_TRE], MAX(Fact_Applications[FTC_TRE])
)`

AR Benchmark =

`LOOKUPVALUE(
Dim_Benchmark[AR_Benchmark],
Dim_Benchmark[Acad_Year], MAX(Dim_Term[Acad_Year]),
Dim_Benchmark[Term], MAX(Dim_Term[Term]),
Dim_Benchmark[FTC_TRE], MAX(Fact_Applications[FTC_TRE])
)`

Yield Benchmark =

`LOOKUPVALUE(
Dim_Benchmark[Yield_Benchmark],
Dim_Benchmark[Acad_Year], MAX(Dim_Term[Acad_Year]),
Dim_Benchmark[Term], MAX(Dim_Term[Term]),
Dim_Benchmark[FTC_TRE], MAX(Fact_Applications[FTC_TRE])
)`

Admit Rate Color =

IF([Admit Rate %] >= [Admit Rate Benchmark], "#509E2F", "#E87722")

Yield Color =

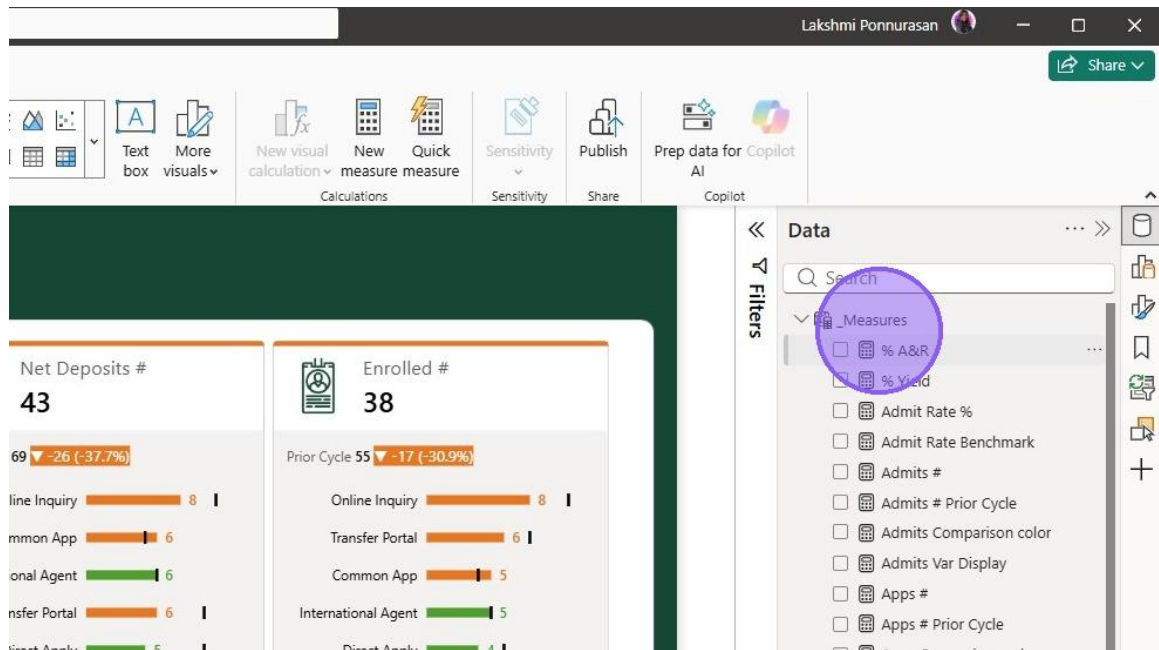

IF([% Yield]>= [Yield Benchmark], "#509E2F", "#E87722")\

A&R Color =

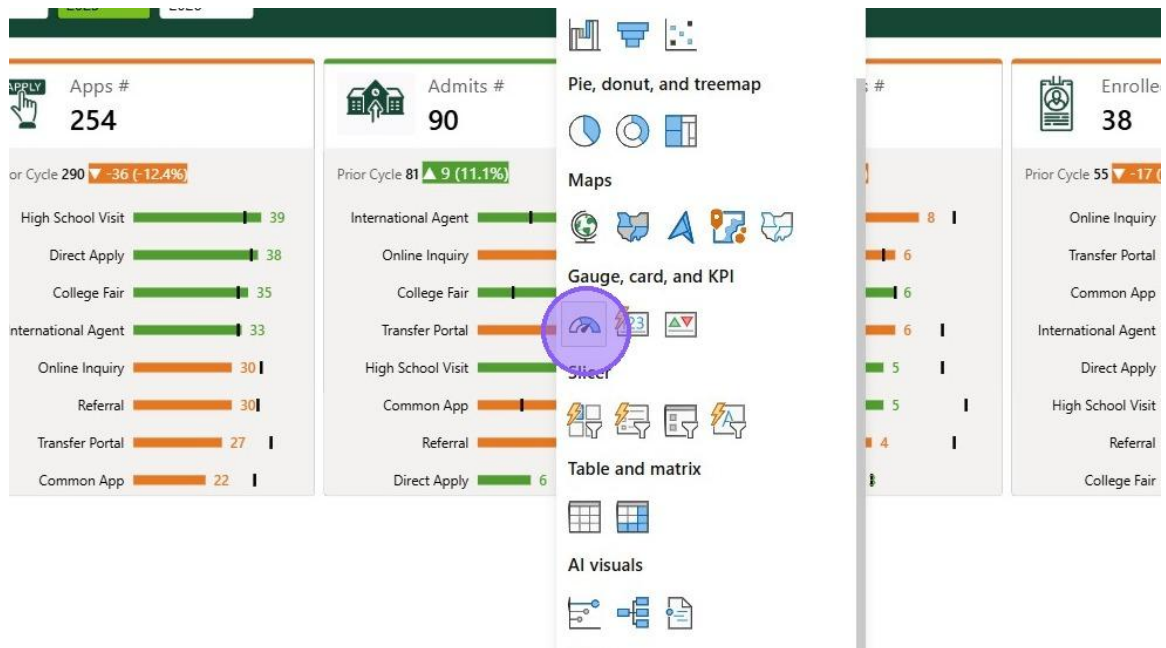

IF([% A&R] >= [AR Benchmark], "#509E2F", "#E87722")\

Total % = 1

Note: For all % measures, make sure you convert the measure into % from the formatting options

2. Select the 'Gauge' visual type

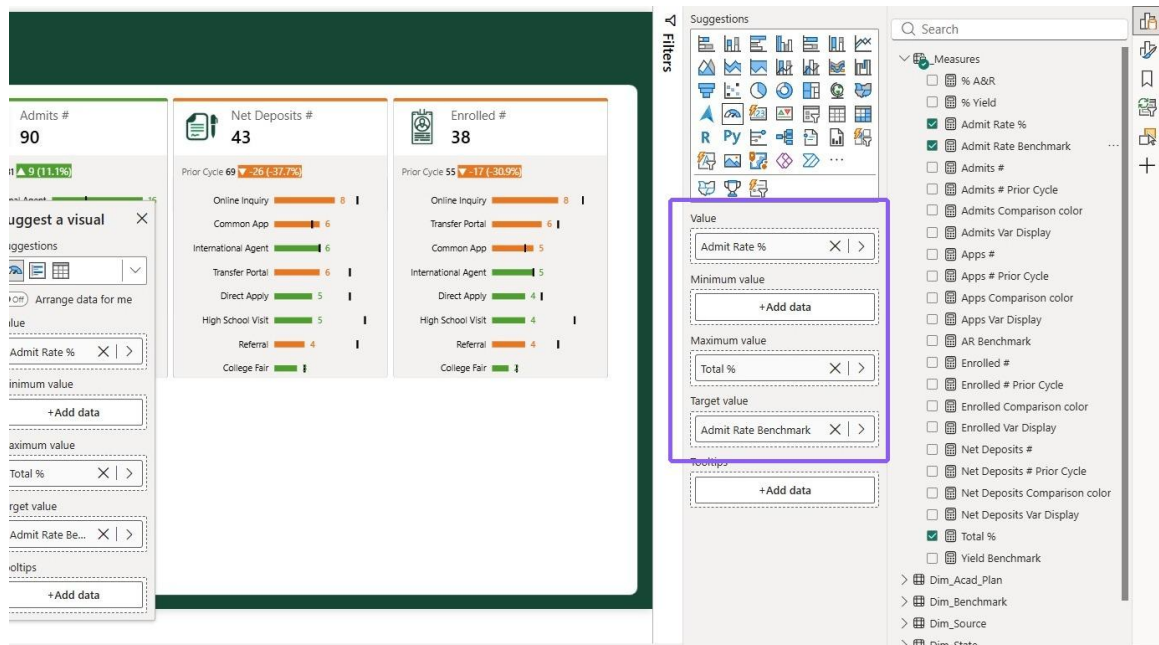

3. Drag and Drop

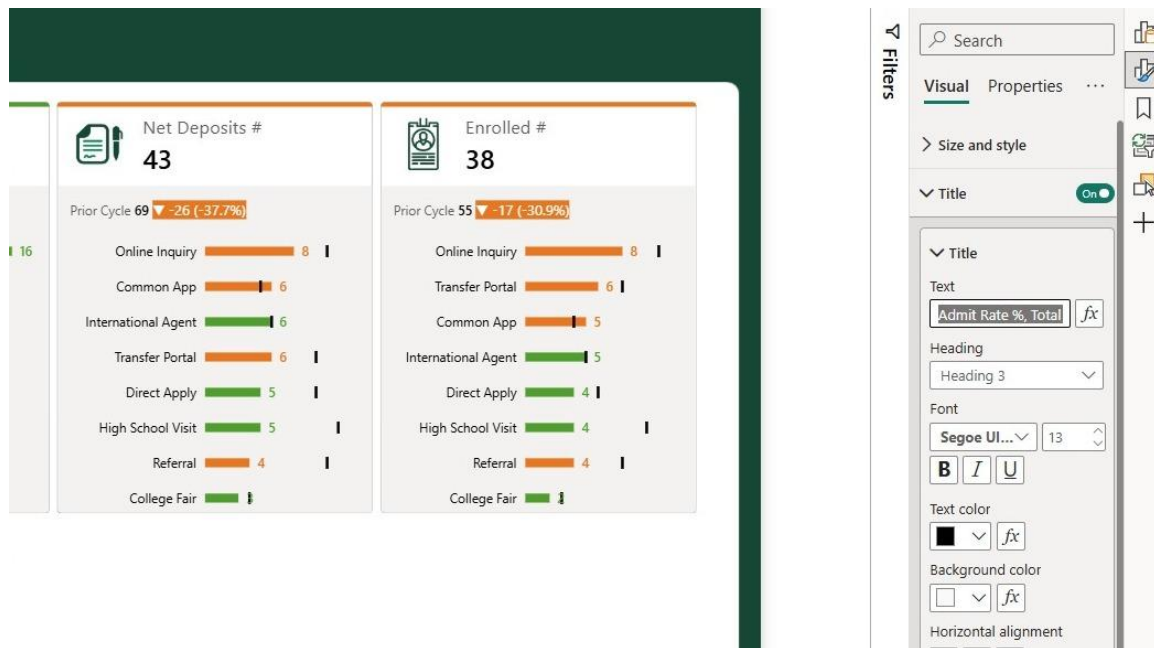

Admit Rate % into Value

Total % into Maximum Value

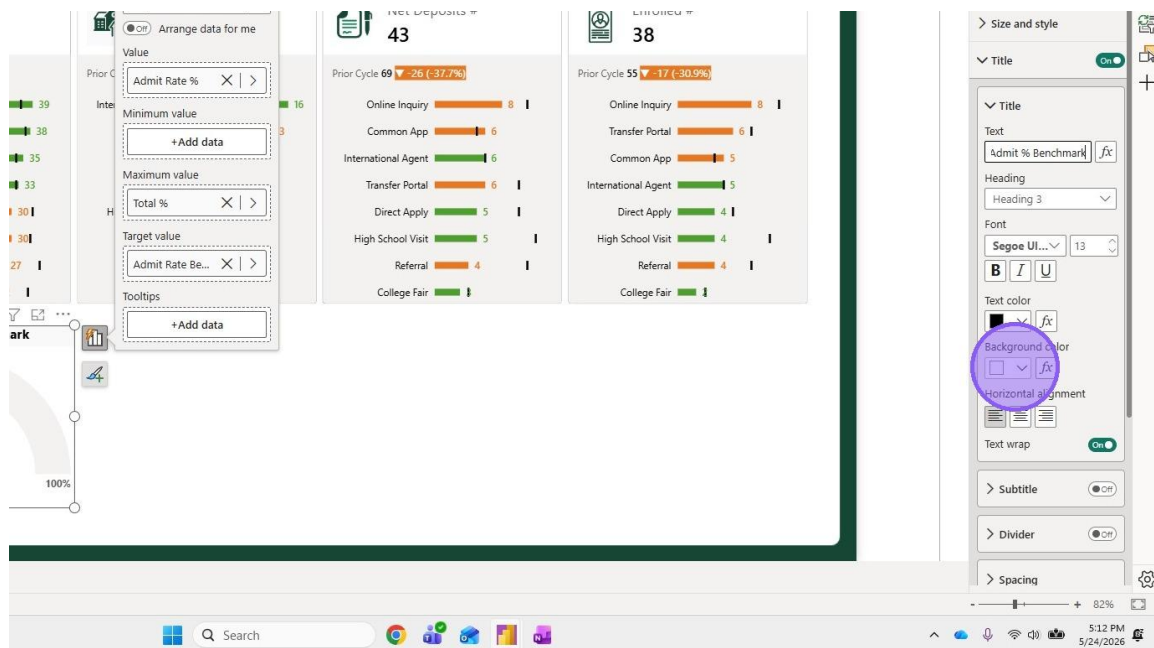

Admit Rate Benchmark into Target Value

4. Change title to Admit % vs Admit % Benchmark

5. Change Background color to no fill or white

6. Adjust the title 'Font Size' to 11

The image shows two data cards side-by-side. The left card is titled 'Net Deposits #' with a value of 43. The right card is titled 'Enrolled #' with a value of 38. Both cards display a 'Prior Cycle' value and a list of categories with corresponding bar charts. The 'Size and style' pane on the right is open, showing the 'Title' section. The 'Font' dropdown is set to 'Segoe UI', and the 'Font size' is set to 13, which is circled in purple.

8. Click fx

The screenshot shows a dashboard with two gauge charts. The left chart is titled 'Net Deposits #' with a value of 43. The right chart is titled 'Enrolled #' with a value of 38. Both charts show a 'Prior Cycle' value and a change percentage. The 'Net Deposits #' chart shows a prior cycle of 69 and a change of -26 (-37.7%). The 'Enrolled #' chart shows a prior cycle of 55 and a change of -17 (-30.9%). Both charts have a list of categories with corresponding values and progress bars. A tooltip for 'Conditional formatting' is visible, stating 'Make this property change under different conditions that you define.' The 'fx' icon is circled in purple. The 'Properties' panel on the right shows the 'Visual' tab with options for 'Size and style', 'Title', 'Gauge axis', 'Colors', 'Data labels', 'Target label', and 'Callout value'.

9. Click "Format style"

The screenshot shows the 'Fill color - Colors' dialog box in Power BI. The 'Format style' option is circled in purple. The dialog box has a 'Fill color' dropdown set to 'Gradient'. Below it, a question 'What field should we base this on?' has 'Admit Rate %' selected. The 'Minimum' section shows 'Custom' selected with a red color swatch. There is an 'Enter a value' input field and an 'Add a middle color' checkbox. The background shows a dashboard with a 'Pipeline' section for the University of Fabricland, with years 2024 and 2025. The 'Source' option is selected under 'College'.

10. Click "Field value"

The screenshot shows the Power BI Desktop interface with the 'Pipeline' visual selected. The 'Fill color - Colors' dialog box is open, and the 'Field value' option is highlighted under the 'Format style' dropdown. The background visual shows a table with columns for 'Applicants' and 'Prior Cycle'.

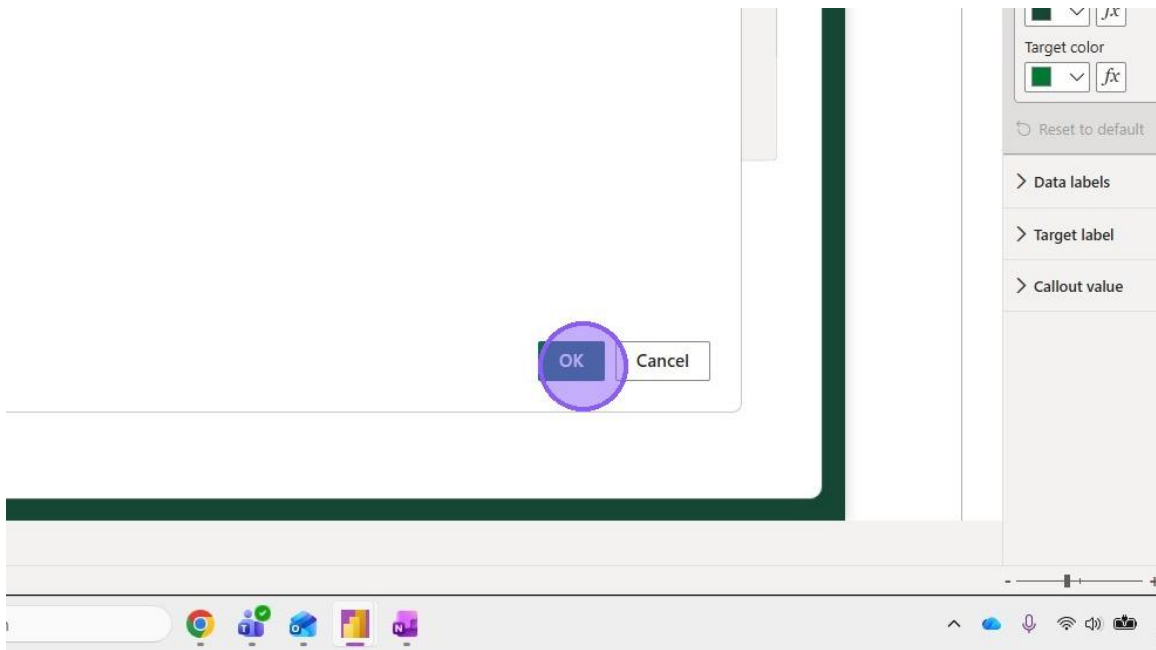

Applicants	Prior Cycle
254	290

11. Click "Admit Rate Color"

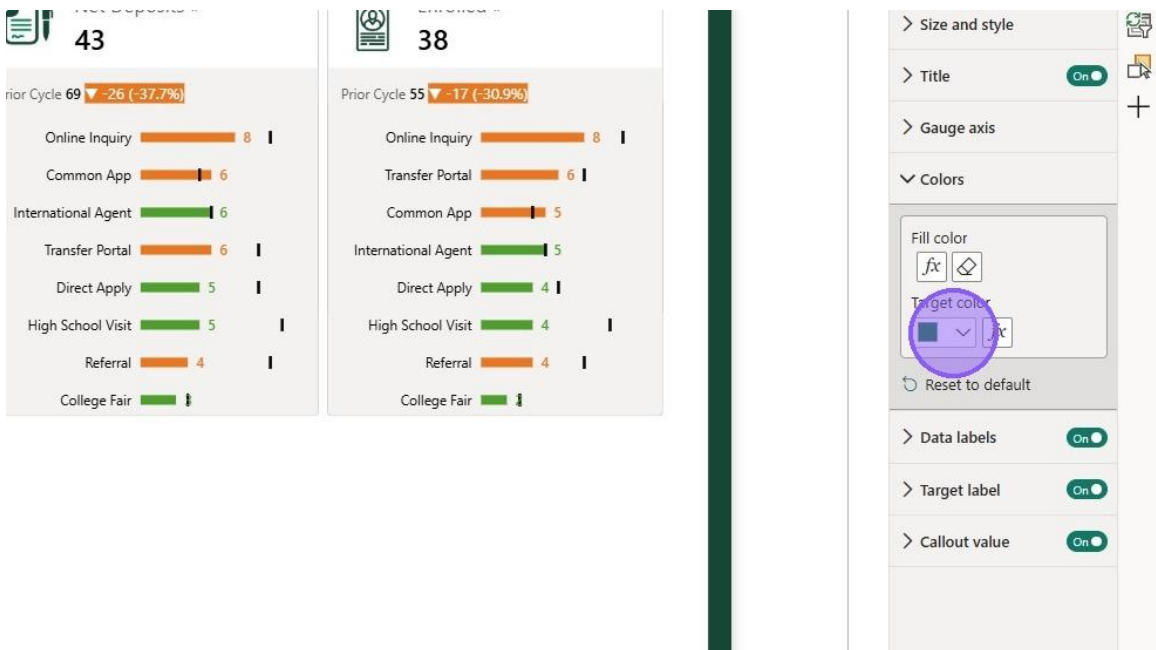

The screenshot shows the Power BI Desktop interface with the 'Pipeline' visual selected. The 'Fill color - Colors' dialog box is open, and the 'Admit Rate Color' measure is highlighted under the 'What field should we base this on?' dropdown. The background visual shows a gauge chart titled 'Admit % vs Admit \$'.

Admit %	Admit \$
33.00%	35

12. Click "OK"

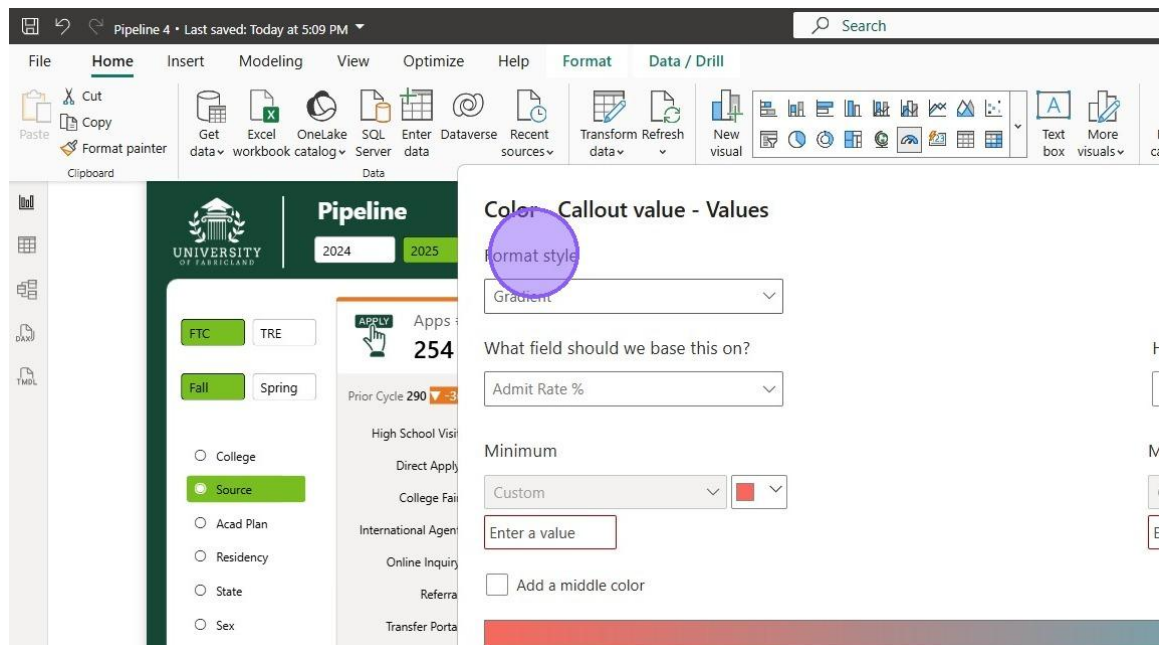

13. Click "Target color" and select black

14. Click fx next to the callout value color

15. Click "Format style "

16. Click "Field value"

The screenshot shows the Power BI ribbon with the 'Format' tab selected. The 'Color' group is active, and the 'Callout value - Values' dialog box is open. In the 'Format style' section, the 'Field value' option is highlighted with a purple circle. The dialog also shows a 'Minimum' value of 'Custom' and a color gradient bar.

17. Click "Admit Rate Color"

The screenshot shows the Power BI ribbon with the 'Format' tab selected. The 'Color' group is active, and the 'Callout value - Values' dialog box is open. In the 'Format style' section, the 'Field value' option is highlighted with a purple circle. The dialog also shows a 'Minimum' value of 'Custom' and a color gradient bar.

What field should we base this on?

[Learn more about conditional formatting](#)

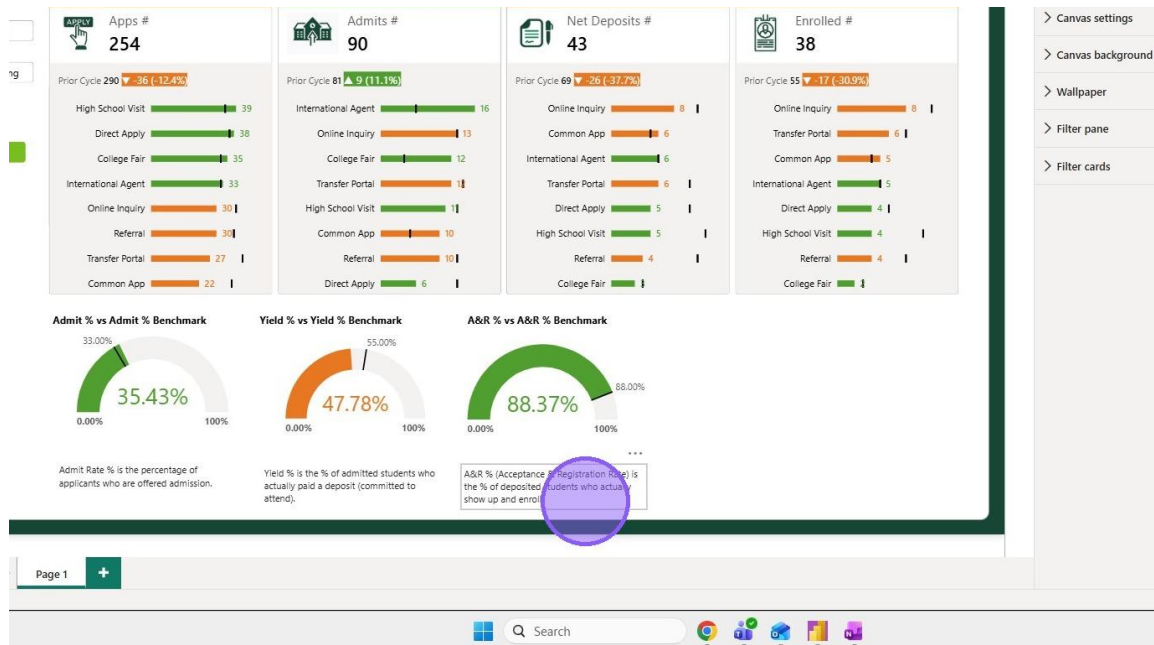

18. Click "OK"

19. Repeat the same with Yield % and A&R % to get something like below.

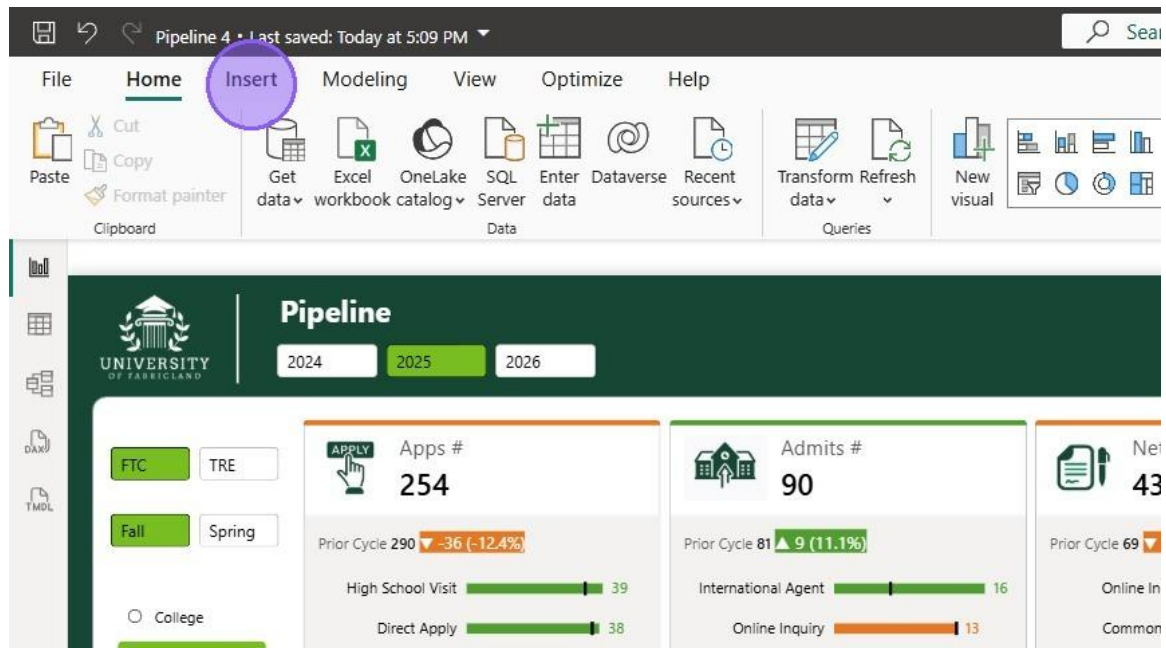

20. Optional! Add text boxes below each gauge visual to explicitly call out the terminology
- Admit Rate % is the percentage of applicants who are offered admission.
- Yield % is the % of admitted students who actually paid a deposit (committed to attend)
- A&R % (Acceptance & Registration Rate) is the % of deposited students who actually show up and enroll.

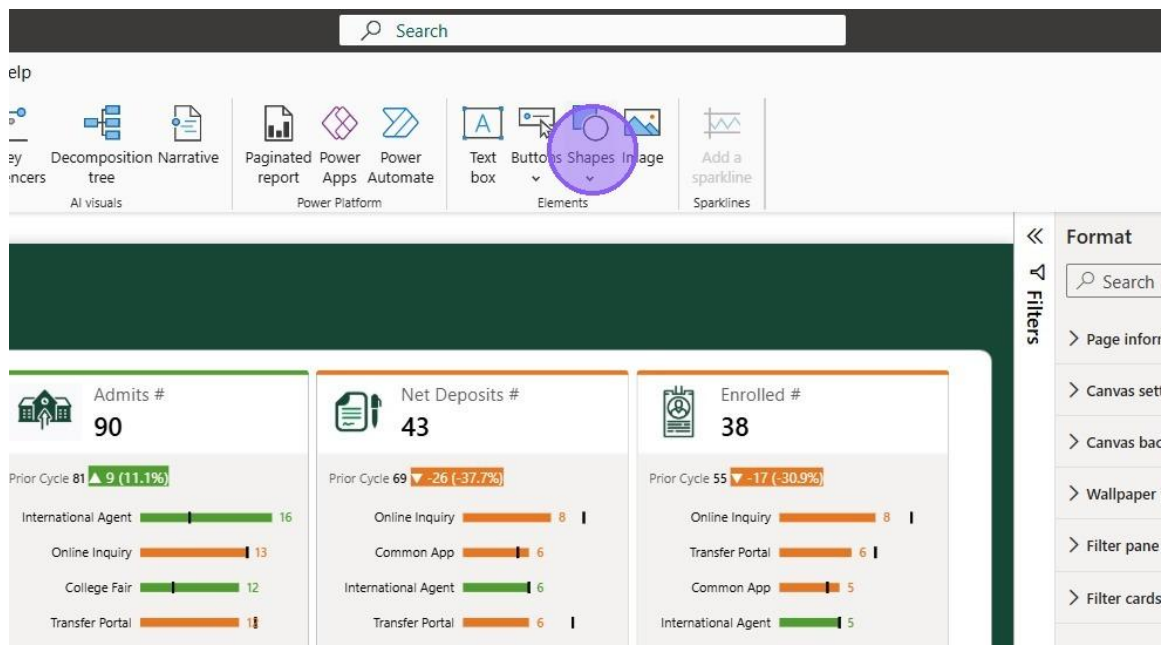

Group the Visuals

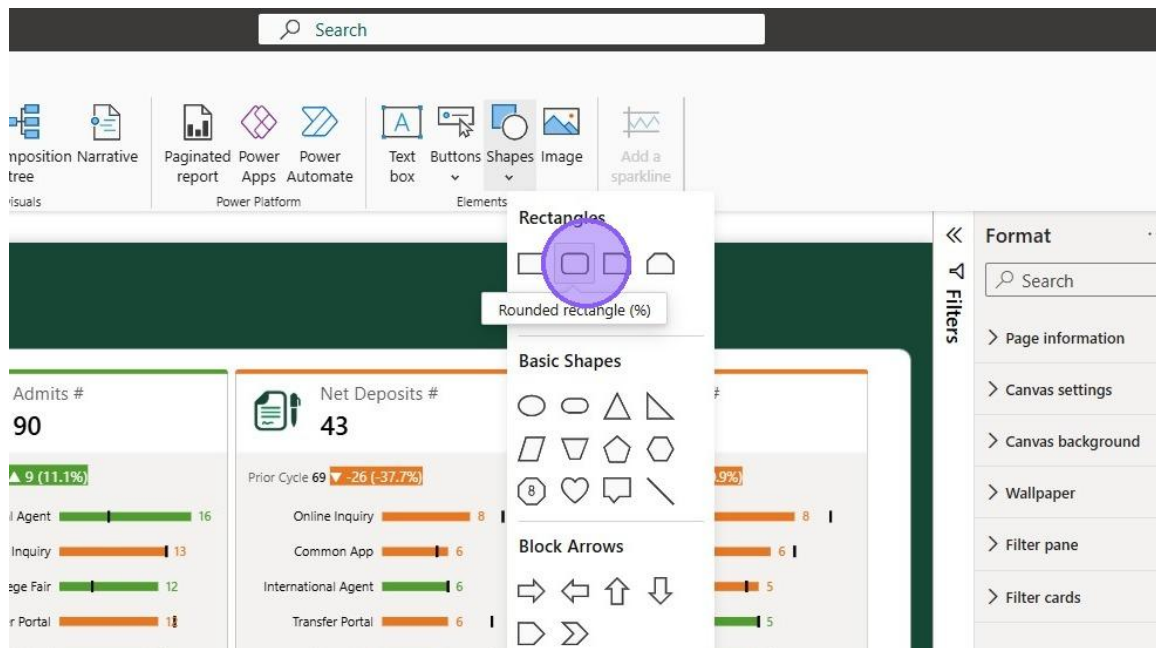

21. Click "Insert"

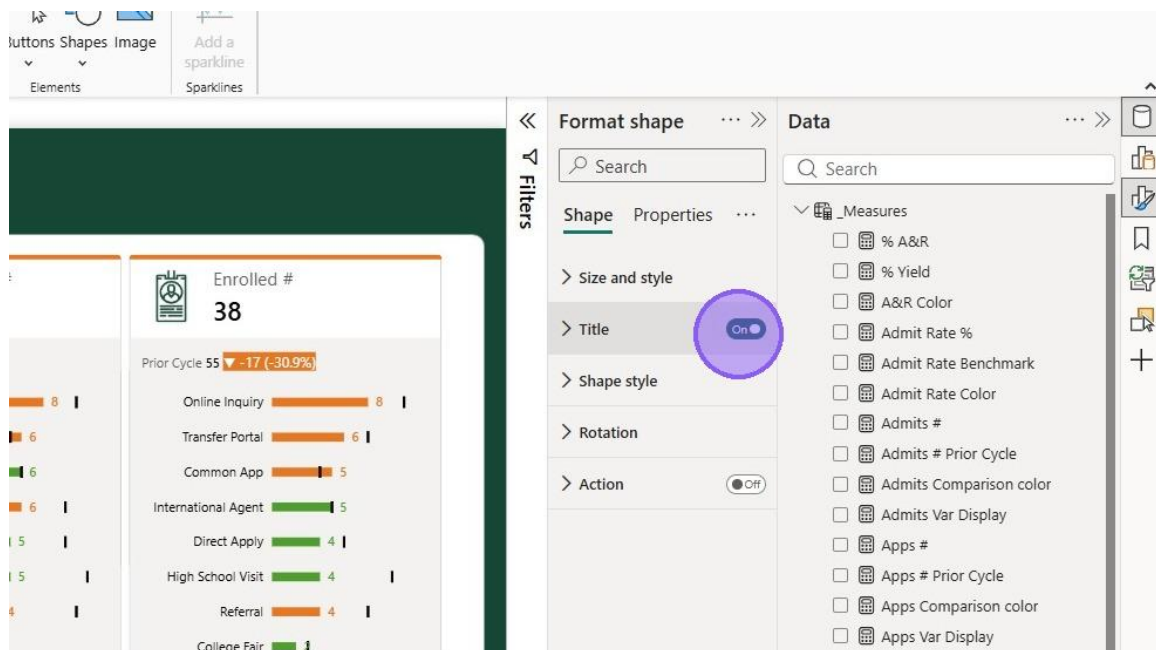

22. Click "Shapes"

23. Click "Rounded rectangle (%)"

24. Switch off the title

25. Click "Shape style"

The screenshot shows the Power Apps interface with the 'Format shape' pane open. The 'Shape style' tab is selected, and the 'Shape style' option is highlighted with a purple circle. The 'Data' pane on the right lists various measures, including '% A&R', '% Yield', 'A&R Color', 'Admit Rate %', 'Admit Rate Benchmark', 'Admit Rate Color', 'Admits #', 'Admits # Prior Cycle', 'Admits Comparison color', 'Admits Var Display', 'Apps #', 'Apps # Prior Cycle', 'Apps Comparison color', 'Apps Var Display', 'AR Benchmark', 'Enrolled #', 'Enrolled # Prior Cycle', and 'Enrolled Comparison color'.
