

Power BI Desktop application Pre-Requisite

Note: Power BI Desktop is only available on Windows operating systems. For Mac users consider Boot Camp to setup a Windows partition on your Mac computer.

<https://support.apple.com/guide/mac-help/use-windows-on-your-mac-mh11850/mac>

You must first verify if you have a 32-bit or a 64-bit Windows operating system. To check your operating system type:

1. From your Windows operating system, open Control Panel, select System and Security, and then choose System.
2. You'll be able to identify if your operating system is 32-bit or 64-bit based on the System type field as shown in the screenshot below.

The screenshot shows the Windows Settings application, specifically the 'System > About' page. The left sidebar contains various settings categories, with 'System' selected. The main content area displays 'IdeaPad S 15ITL05' at the top. Below this, the 'Device specifications' section is expanded, showing a table of system information. The 'System type' entry is highlighted with a red box, indicating '64-bit operating system, x64-based processor'. Other specifications include device name, processor, RAM, device ID, product ID, and pen/touch support. Below the specifications, there are links for 'Related links' such as 'Domain or workgroup', 'System protection', and 'Advanced system settings'. The 'Windows specifications' section is also visible, showing details about the Windows 11 Enterprise edition, version, installation date, OS build, serial number, and experience pack.

Device specifications	
Device name	IdeaPad S 15ITL05
Processor	11th Gen Intel(R) Core(TM) i7-1165G7 @ 2.80GHz 2.80 GHz
Installed RAM	16.0 GB (15.8 GB usable)
Device ID	
Product ID	00329-10280-00000-AA551
System type	64-bit operating system, x64-based processor
Pen and touch	Touch support with 10 touch points

Windows specifications	
Edition	Windows 11 Enterprise
Version	22H2
Installed on	11/28/2022
OS build	22621.3155
Serial number	PF3APZB1
Experience	Windows Feature Experience Pack 1000.22684.1000.0

Install the Power BI Desktop application

- 1. Download and install the Microsoft Power BI Desktop from <https://aka.ms/pbiSingleInstaller>.

Download

Total size: 797.4 MB

- 3. After the download is finished, open the file appropriately named either PBIDesktopSetup_x64.exe or PBIDesktopSetup.exe

Recent download history

PBIDesktopSetup_x64.exe

797 MB • Done

4. In the pop-up window for the Power BI Setup Wizard, select your preferred Language and select Next. After the Setup Wizard computes the space requirements, select Next.

5. Accept the terms in the License Agreement and select Next.
6. Choose where Power BI should be installed and select Next. It's best practice to keep Power BI in the Program Files of your C: drive, and should automatically install to the C:\Program Files\Microsoft Power BI Desktop\ directory. Select Next after configuring the destination folder, then Install.

7. Finally, select Finish to complete the installation.

Or if you have Windows 10 or later, you can use the Microsoft App Store to download and install the Power BI Desktop app. If you already have Power BI Desktop installed, ensure you have the latest version downloaded and installed.
